Created By	Naveen M
Version	7.0

Document Versioning

Version	Released on	Description	Status	Modified By	Approved By
Version 1.0	March 06, 2025	First Draft	Approved	NA	Badmanaban Danesh
Version 2.0	June 30, 2025	- Removed ProProfs from the certification module - Added in-house certification creation and hosting - Added Question Banks (QBs) creation with multiple question types - Revised Manual Grading Criteria - Enabled Levenshtein distance algorithm for subjective questions (Auto-QA Score) - Added Certification Manager and Question Bank Manager	Approved	Naveen M	Badmanaban Danesh

Version 3.0	August 28, 2025	• Added Version Control • Override Certification Results • Add Another Try and Remove User • Maps Component in Question bank • Calculation Method for Multiple Choice question type	Approved	Tanvi Raja	
Version 4.0	October 07, 2025	• Added Certification Mode section to certification creation. • Added Certification Guideline document section to certification creation. • Added View Reference Documents section to certification creation. • Added Upload Offline Records sub-section to See Participants section.	Approved	Naveen M	Badmanaban Danesh
Version 5.0	January 07, 2026	• Updated Adjust Order, Copy, and Delete Questions sub-section under Create Question Bank section. • Added Import Modular Question sub-section under Subjective Type Questions (Modular Question) section. • Added Clone Question Bank sub-section under Manage Question Bank section. • Updated Add New Certification section by adding notes on Language Test Certification Category.	Approved	Naveen M	Badmanaban Danesh

		Added Scoring Method to support different certification categories.			
	January 28, 2026	Added Clone Certification sub-section under Clone Certification section.	Approved	Naveen M	Badmanaban Danesh
Version 6.0	February 23, 2026	Added Question Bank for Practice Certification section to include guided response for applicants.	Approved	Naveen M	Badmanaban Danesh
	March 30, 2026	Added Mandatory Questions sub-section under Question Bank for Exam Certification under Create Question Bank.	SME Review	Naveen M	
		Added shuffling options for single- and multi-select format questions; updated the screenshots.	SME Review	Naveen M	
Version 7.0	July 03, 2026	- Override Certification Status - Download Question bank template under edit and view - Enable Certification Retry from Create and Edit flows - Review Upload Errors - System audit log

Manage Certification

Overview

In OneForma, Certifications can be created within OneForma and linked with any project. Jobs associated with these projects require resources (applicant(s)) to take up the certification assessment so that they become eligible to work on job-associated tasks. The created certifications are hosted on OneForma itself.

To create certifications, the L&D or the QM team member must create Question Bank (QB) based on Project Managers requirement. The recruitment team then proceeds to link the QB with any certification and assign SME resources to grade it if the certification required manual evaluation.

A certification can either be part of the job application workflow or be directly assigned to an applicant. The applicant must complete the certification, and if it requires manual grading, the Project Manager will assign an SME grader to evaluate it.

Certification assessment taken by the applicants can be graded automatically or manually, depending on the configuration.

- **Auto-Grading:** The platform automatically evaluates the assessment and instantly displays the results to the applicant upon completion.
- **Manual Grading:** After a certification assessment is completed, a Subject Matter Expert (SME) reviews and grades it, and the results are shared with the applicant once the grading is submitted.

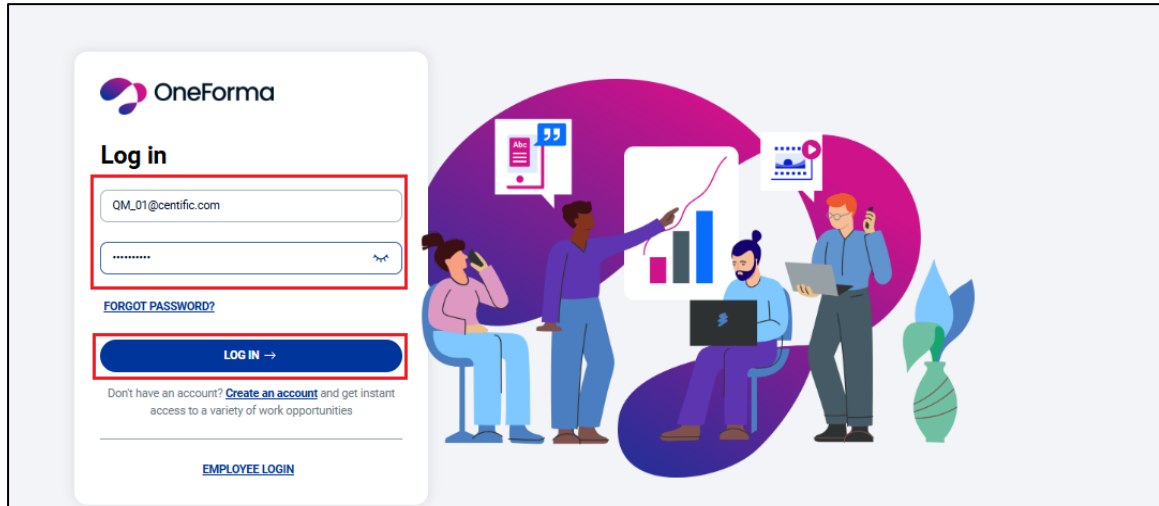

Key Activities

- Question Bank Management
 - Create, edit, and publish QBs.
 - Link QBs to certifications.
- Certification Management
 - Create, edit, and view certifications.
 - See the participants appearing for each certification.
 - Enable and disable certifications.
- Manual Grading Assignment
 - Create user group for SMEs.
 - Assign, unassign, and reassign manual grading tasks to SMEs.

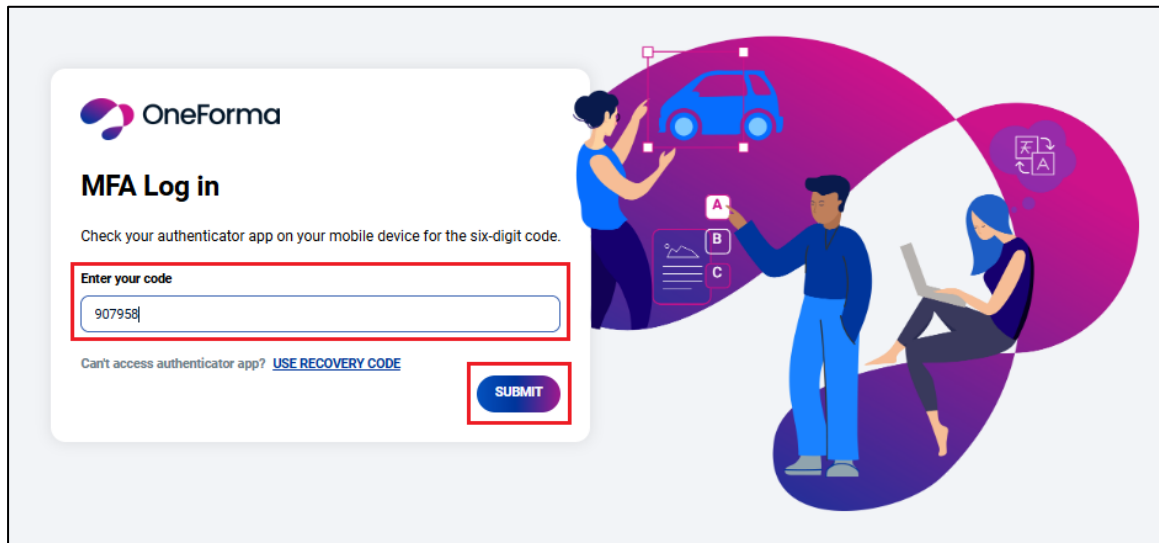

Question Bank

In the first step as QM or an L&D manager, you need to create a question bank.

1. Log in to the **OneForma Platform** as a Quality Manager or Learning and Development Manager (L&D).

2. Enter the code sent to your Authenticator app in the **MFA Log in** page.

3. Click **Submit**.

Question Bank Types

You can create two types of QBs (exam and practice) and link them with certifications. Both QBs include similar question types, with minimal configuration level changes for certain question types.

- **Exam:** These are actual certification exams that act as qualifiers for job applications.
- **Practice:** These help applicants to prepare diligently for actual certifications.

Note: Selecting the QB type decides the nature of certification.

Available Question Types

In OneForma, you can create the following question types which can be categorized as shown in the table.

Question Category	Question Type	Description	Grading Type
Objective	Single Choice	Allows applicants to select one answer	Auto grading
	Multiple Choice	Allows applicants to select multiple answers	
	Fill in the Blanks	Allows applicants to enter the right answer(s) in the blank field(s)	
Subjective	Essay	Allows applicants to enter detailed, structured, and descriptive answer in the designated field(s)	Auto Grading/Manual Grading
	Translation	Allows applicants to enter the translated text in the designated field(s)	
	Transcription	Allows applicants to enter the verbatim of an audio file in the designated field(s)	
	Nested	Allows applicants to select or enter answers for a single, cohesive assessment module.	
	Modular	Allows applicants to select or enter answers for a single, cohesive assessment module	Only Manual Grading

Grading Types

In OneForma, you can use two grading types to assess applicants' answers.

Auto-QA

The system can auto grade subjective type questions like transcription and translation. It uses **Levenshtein Distance** algorithm to assess the accuracy of applicants' answers.

You can define a minimum pass score and can also use it in combination with manual grading.

1. Navigate to the Question Settings section of any subject question type
2. Switch **Auto-QA** toggle to enable automatic grading.

Note: Ensure the Grading Criteria switch is turned off, as enabling it will disable the Auto QA Pass Score field.

3. Enter the score in the **Auto-QA Pass Score** field for auto-evaluation.
4. Enter the sample answer in the relevant field.

Note: The field for entering a sample answer may vary depending on the type of question selected.

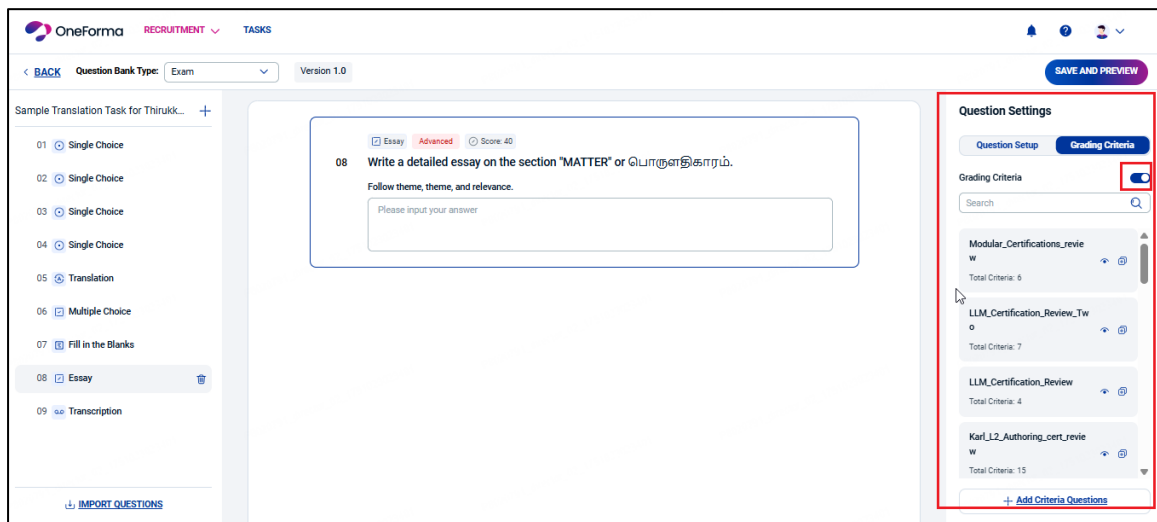

Manual Grading

You can manually grade subjective type questions using an existing grading criterion or create a new one.

Configure Grading Criteria

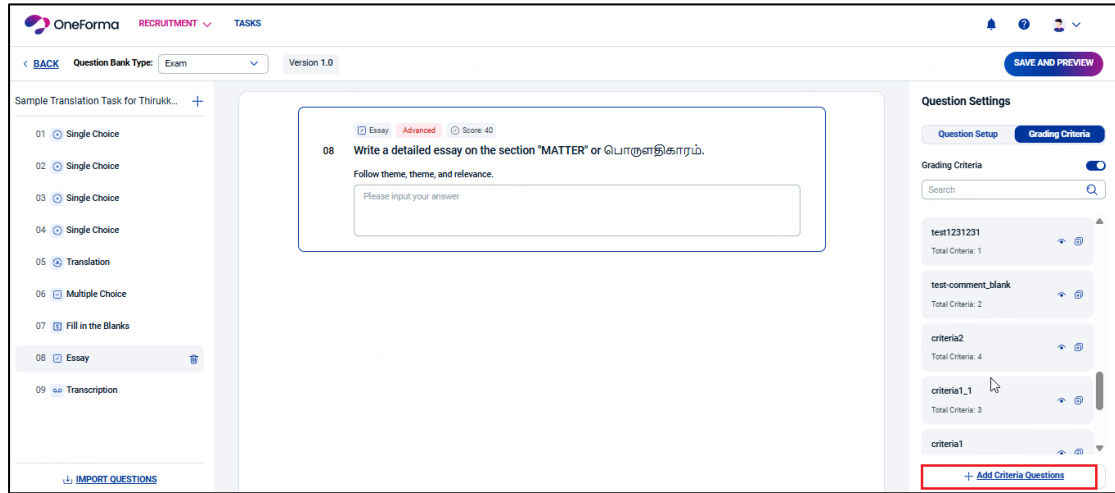

You can create a new grading criterion and apply it across all relevant question types.

1. On the **Question Settings** section, switch to **Grading Criteria**.

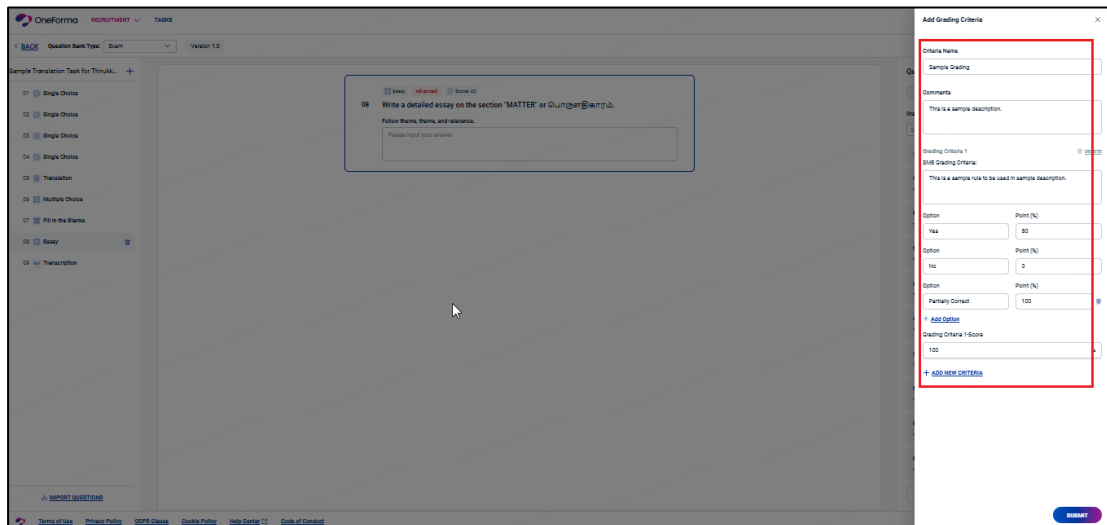

2. Click the toggle button next to **Grading Criteria** to enable manual grading.
3. Click **Add Criteria Questions**.

Note: You can apply grading to your questions by selecting existing pre-created criteria and clicking on it.

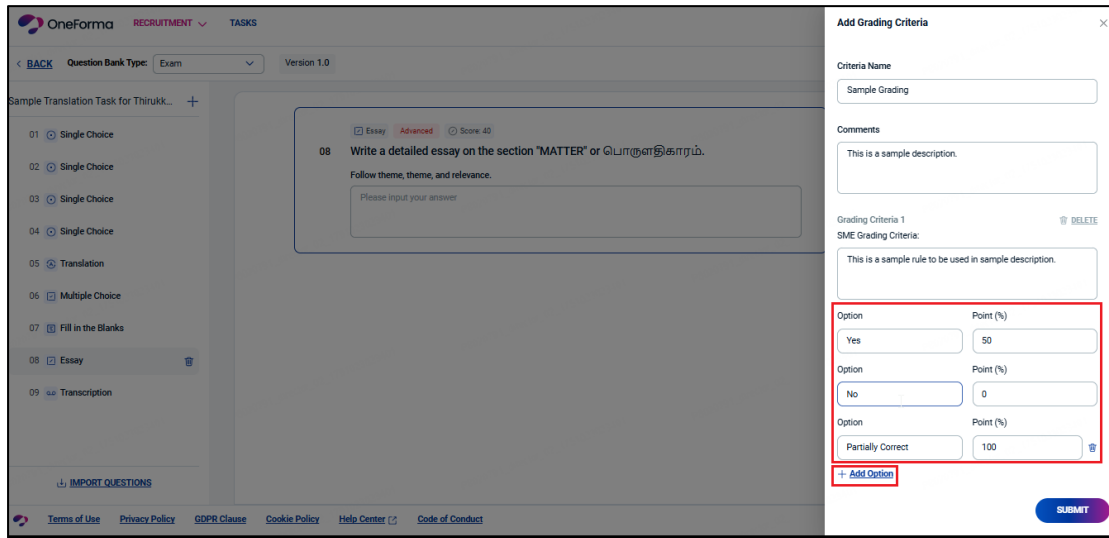

4. Enter the information in the given fields.

- **Criteria Name:** Name of the Grading Criteria
- **Comments:** Comments to guide the SME during evaluation
- **SME Grading Criteria:** Guidelines for the SME to follow when evaluating response.

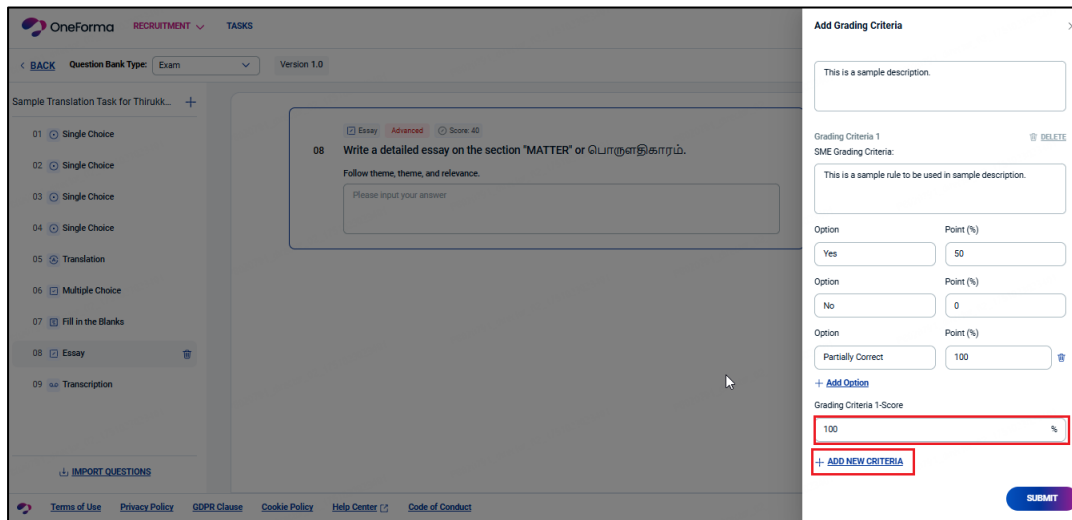

5. Click **Add Option** to add more options.

Notes:

- The application has two options by default.
 - You can enter custom options in place of **Yes** and **No**, add more options and configure those as needed.
 - You can assign points to each option in the **Point (%)** fields.

6. Enter a score in the **Grading Criteria 1-Score** field.

Notes:

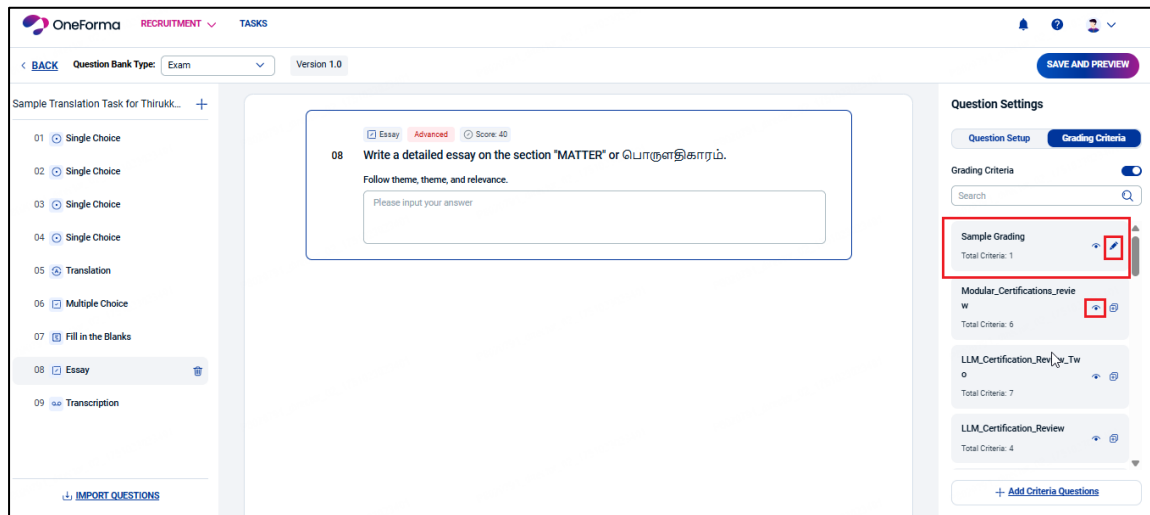

- A single Grading Criteria can include multiple criteria. To add more criteria, click **Add New Criteria**.
7. Adjust the distribution of marks accordingly when adding new criteria, the percentage scores assigned to them must add up to 100%.
8. Click **Submit**.

Clone Grading Criteria

After a grading criteria is created, the same can be cloned and reused with some minor modifications.

You can only view the grading criteria created by others. To use it, clone the criteria and rename it as desired. You can also clone a grading criterion and edit to fit your requirements.

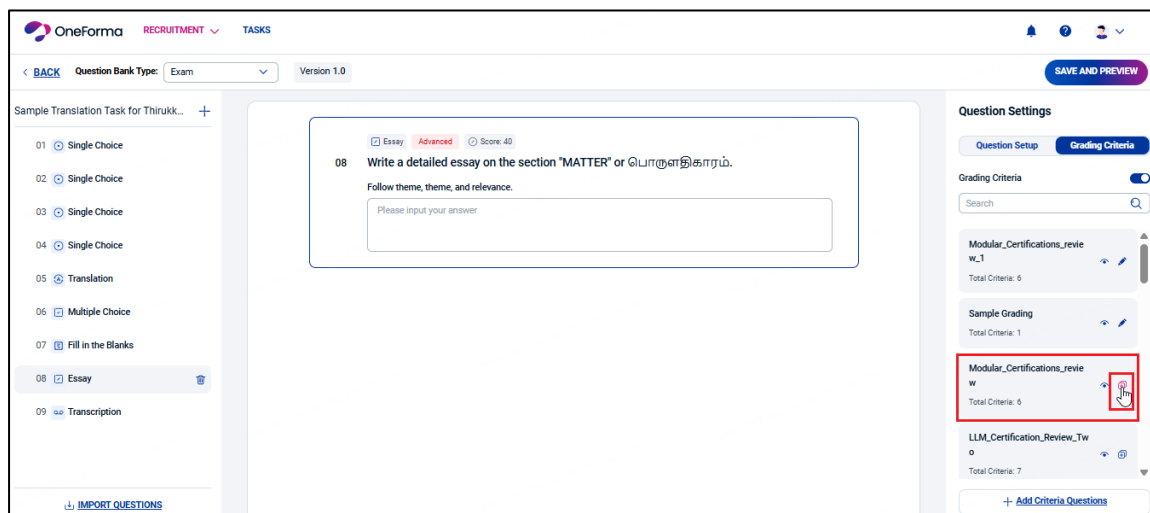

1. Click the **View icon** to see the grading criteria details.

2. Click the **Edit icon** to edit the grading criteria.

Note: If you are the creator of a Grading Criteria, you can edit it directly; otherwise, you must clone it before making any edits.

3. Click the **Duplicate icon** to clone
4. Click the **Pencil icon** to edit.

Configure Questions and Question Type

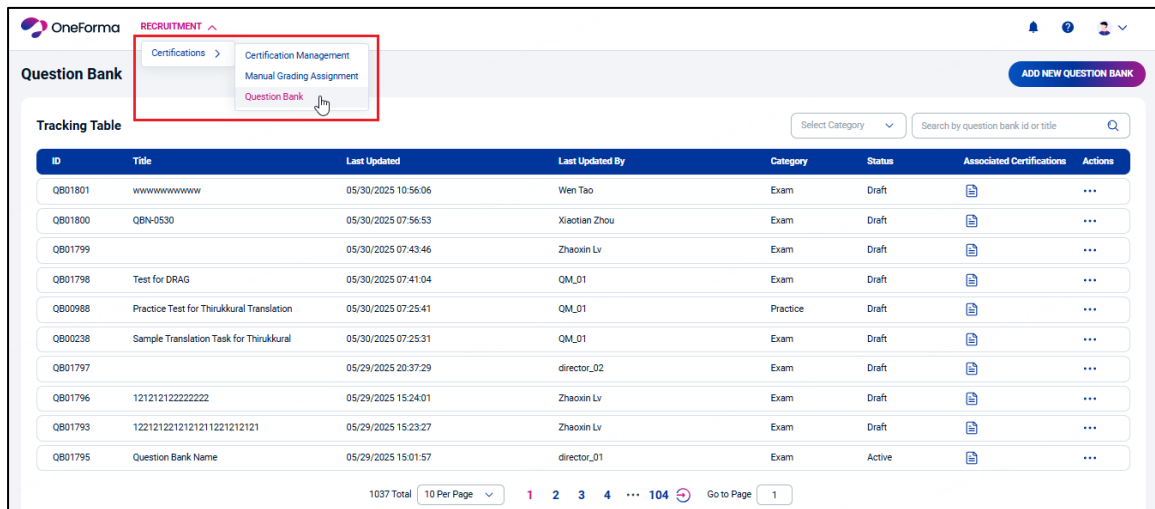

The QB page has three different panes, with each pane allowing you to perform the following actions.

Pane	Description	
Right	Allows you to add/select different question types and components	
Center	Allows you to preview questions as they are configured.	
Left	Allows you to configure/edit questions and add grading criteria	
	Auto-Graded You can only configure the questions under Questions Settings .	Manual-Graded You can configure both questions and grading criteria under Question Settings . Question Setup: Configure questions Grading Criteria: Configure grading criteria or modify existing Grading Criteria

Create Question Bank

1. Navigate to the **Recruitment** module.
2. Select **Certifications** and click **Question Bank**.

The **Tracking Table** displays all the QBs, along with their **statuses** and **associated certifications**.

Question Bank for Practice Certification

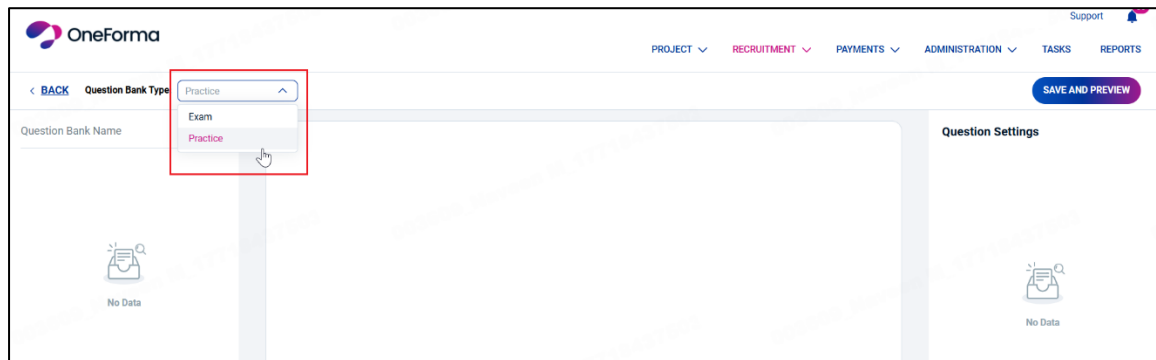

Practice certifications help applicants prepare diligently for exam certification. They are set up the same way as exam certifications. However, they include guided responses for certain question types to help applicants in their preparation journey.

The following table shows question types with guided response.

Question Category	Question Type	Component/Subtype	Guided Response Available
Objective	Single-select	-	Yes
	Multi-select	-	Yes
Subjective	Nested	Single	Yes
		Multi-select	Yes
	Modular	Checkbox Group	Yes
		Radio Group	Yes
		Select	Yes

Note: Take help from your colleagues to understand option-pairing for feedback responses.

1. From the **Question Bank Type** drop-down, select **Practice**.

Single Select

1. Enter the question in the **Question Title** box.
2. Enter a description if needed.
3. Select **Question Difficulty Level** and, if needed, overwrite the predefined score with your own.
4. Select a **Question Difficulty Level**.

Note:

- You can also overwrite the predefined score.
- The platform has predefined scores for each difficulty level.
 - Basic - 10
 - Intermediate - 20
 - Advanced - 30

5. Enter the answer choices in each option box.

Note:

- There are three options by default.
- You can click **+Add Option** to include more options if needed.

6. Select all the right options.
7. Select the calculation method.

Method Name	Description		
Whole-pair scoring	Awards points only when all correct options are selected. No points are rewarded if any correct option is missed or any incorrect option is selected.		
Partial scoring	Awards points for each correctly selected option and deducts points for each incorrectly selected option, based on the defined scoring logic.		
Custom Scoring	Awards points according to a user-defined scoring formula configured for the question.		
	The table shows the fields within calculate formula .		
	Option	Description	System-generated
	A	Total number of options	Yes
	B	Number of correct options	Yes
	C	Positive points for correct options <i>(depends on the custom score assigned to the question difficulty level)</i>	Yes
	D	Number of incorrect options	Yes

	E	Negative point to be deducted for incorrect option(s)	To be added manually
--	---	---	----------------------

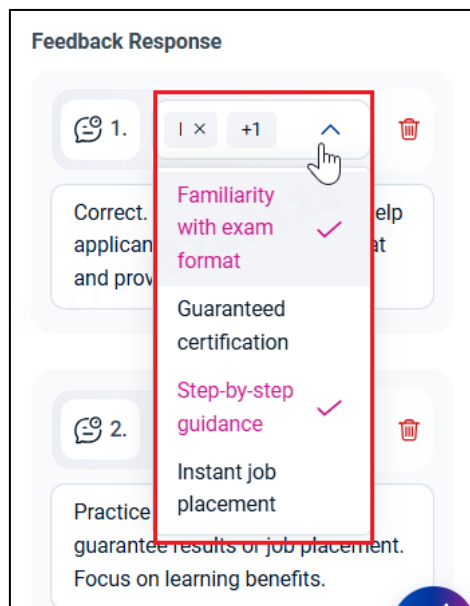

8. Under the **Feedback Response** section, click **Add Feedback**.

Note: You must add guided responses to each incorrect and correct option.

9. Select the relevant option.

Note: You can add multiple options for each guided response.

10. Enter the feedback response in the text field.

Note: Repeat steps 8 and 9 to the point you have added responses to all options.

Modular

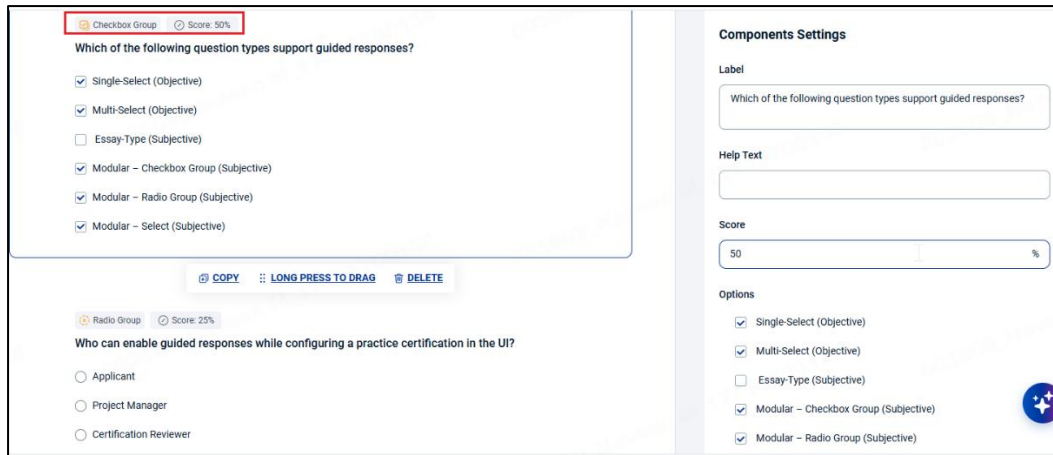

You can add guided responses to three selection-type components of Modular Question type.

Checkbox Group

1. Click the + icon and select **Checkbox Group**.
2. Enter the question in the **Label** field.
3. Enter the **Help Text** if needed.
4. Enter the score percentage.
5. Enter all the options and select the options with correct answers.

Note: You can add more options by clicking **Add Option**.

6. Enter **comments** if needed.
7. Select the relevant calculation method.

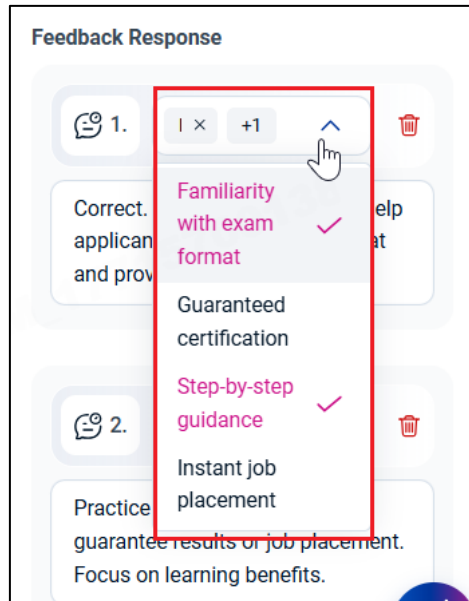

8. Under the **Feedback Response** section, click **Add Feedback**.

Note: You should add guided responses to each incorrect and correct option.

9. Select the relevant option.

Note: You can add multiple options for each guided response.

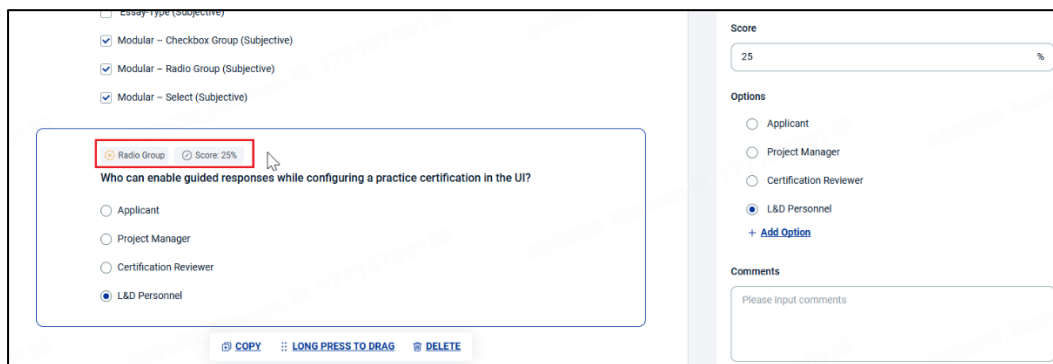

10. Enter the feedback response in the text field.

Note: Repeat steps 8 and 9 to the point you have added responses to all options.

Radio Group

1. Click the + icon and select **Radio Group**.
2. Enter the question in the **Label** field.
3. Enter the **Help Text** if needed.
4. Enter the score percentage.

5. Enter all the options and select the options with correct answers.

Note: You can add more options by clicking **Add Option**.

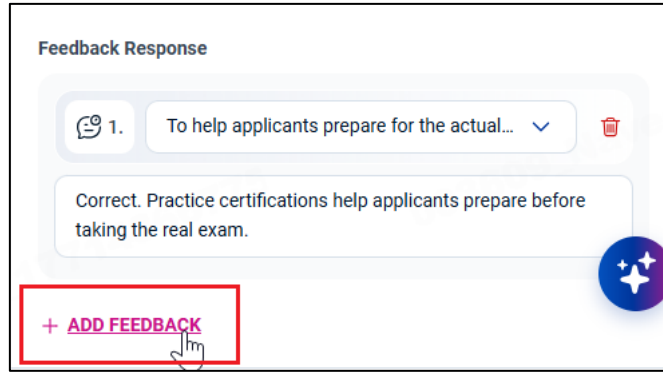

6. Enter **comments** if needed.

7. Select the relevant calculation method.

8. Select the right option.

9. Under the **Feedback Response** section, click **Add Feedback**.

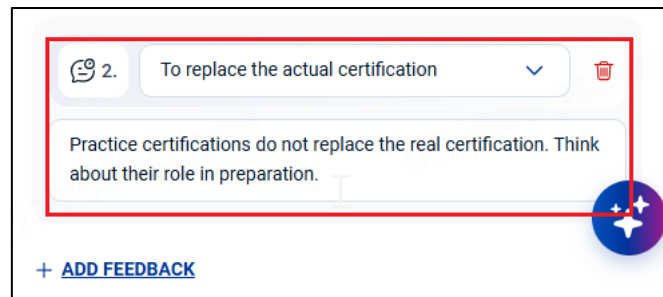

Note: You must add guided responses to each incorrect and correct option.

10. Select the relevant option.

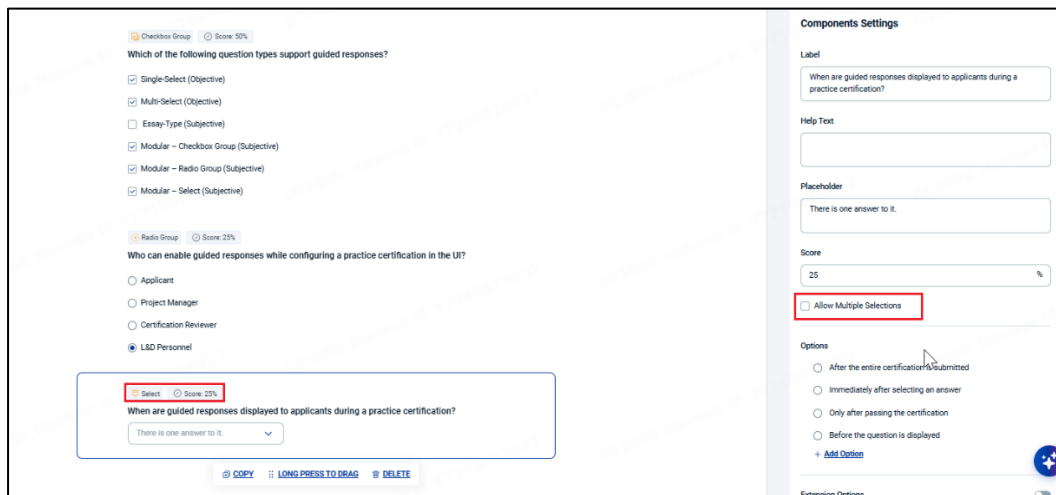

11. Enter the feedback response in the text field.

Note: Repeat steps 8 and 9 to the point you have added responses to all options.

Select

1. Click the + icon and choose **Select**.
2. Enter the question in the **Label** field.
3. Enter the **Help Text** and **Placeholder** text if needed.
4. Enter the score percentage.

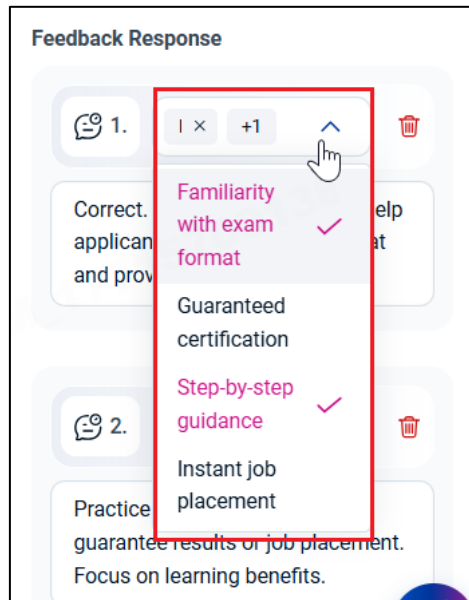

5. Enter all the options under relevant fields.

Note:

- You can convert single choice into multiple choice by selecting the checkbox.
- You can add additional options by clicking **Add Option**.

6. Select the correct options.
7. Enter **Comments** if required.
8. Under the **Feedback Response** section, click **Add Feedback**.
Note: You should add guided responses to each incorrect and correct option.
9. Select the relevant option.
Note: You can add multiple options for each guided response.

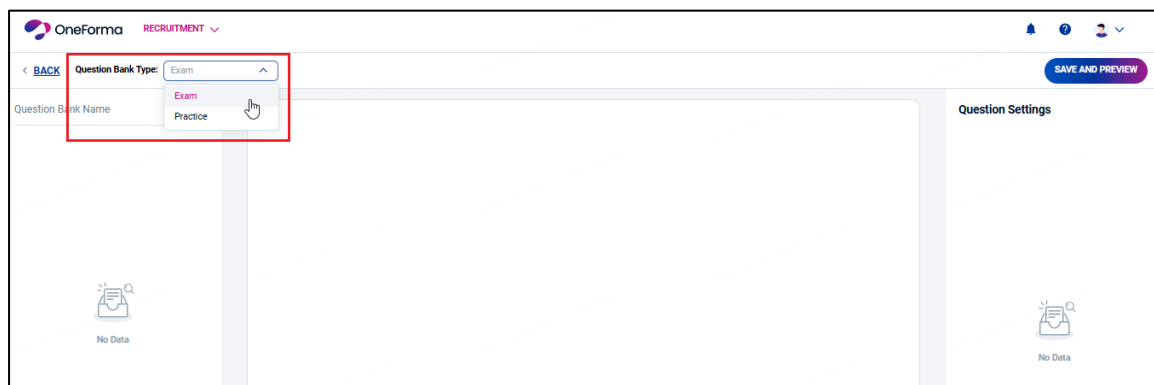

10. Enter the feedback response in the text field.
Note: Repeat steps 8 and 9 to the point you have added responses to all options.

Nested

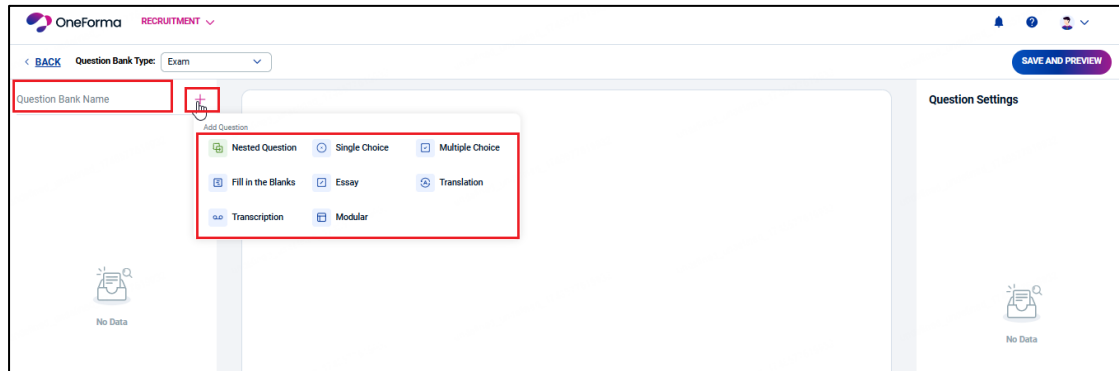

You can add guided responses to two question types of Nested Question type. Follow the same procedure of single and multi-select question types.

Question Bank for Exam Certification

1. From the **Question Bank Type** drop-down, select **Exam**.

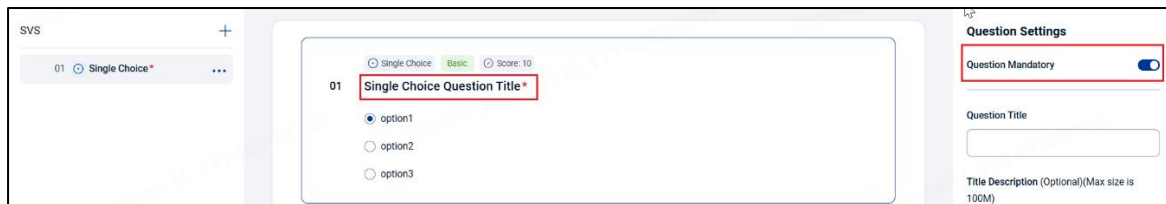

2. Enter a name for the QB.
3. Click **+** to add questions.
4. Select the question type from the available options.

Mandatory Questions

After you select a question type, you can mark a question mandatory. This ensures that applicants cannot leave questions unanswered before submitting the certification.

This is applicable for all question types. All questions, marked as mandatory, appear with a * symbol appended to question.

Objective Type Questions

Objective type questions allow you to configure questions with predefined answers. The system automatically evaluates applicants' answers against the predefined answers and produces results instantly.

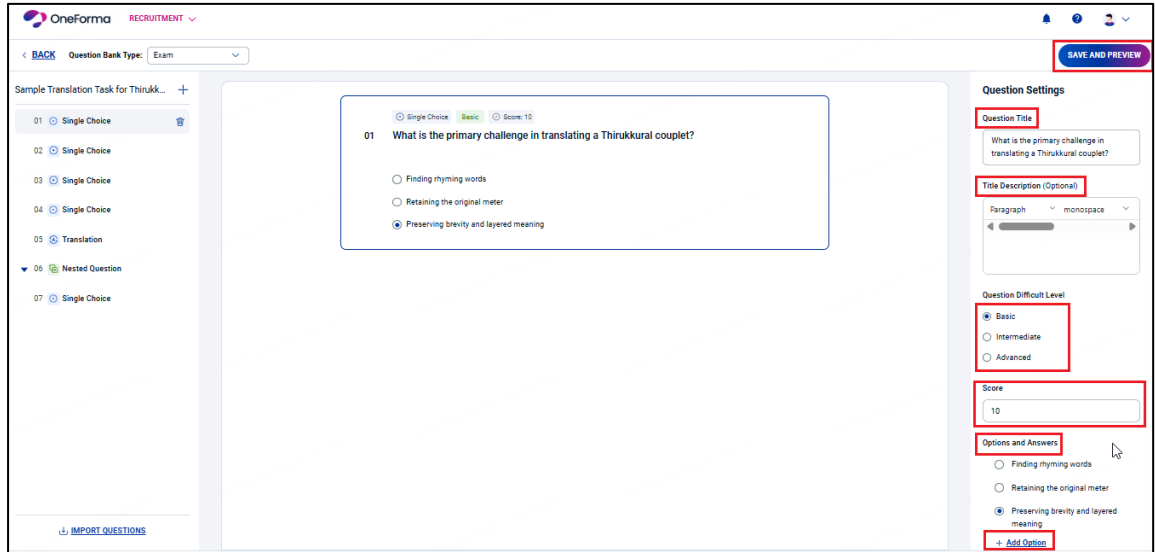

Single Choice

Single choice questions are used to create questions that require applicants to select one correct answer.

1. Enter your question in the **Question Title** box.
2. Enter a description if needed.
3. Select **Question Difficulty Level** and, if needed, overwrite the predefined score with your own.

Note: The platform has predefined scores applied to each difficulty level.

- Basic - 10
 - Intermediate - 20
 - Advanced - 30
4. Enter the answer choices in each option box. The platform provides three options by default, and you can click **+Add Option** to include more if needed.
 5. Select the correct option.

The screenshot shows the OneForma interface for creating a question. On the left, a sidebar lists question types: 01 Single Choice, 02 Single Choice, 03 Single Choice, 04 Single Choice, 05 Translation, 06 Nested Question, and 07 Single Choice. The main area displays a question configuration for a Single Choice question. The question title is "01 What is the primary challenge in translating a Thirukkural couplet?". The options are: Finding rhyming words, Retaining the original meter, and Preserving brevity and layered meaning. The right sidebar shows the "Question Settings" panel with fields for Question Title, Title Description (Optional), Question Difficulty Level (Basic, Intermediate, Advanced), Score (10), and Options and Answers. The "Add Option" button is highlighted at the bottom of the options list.

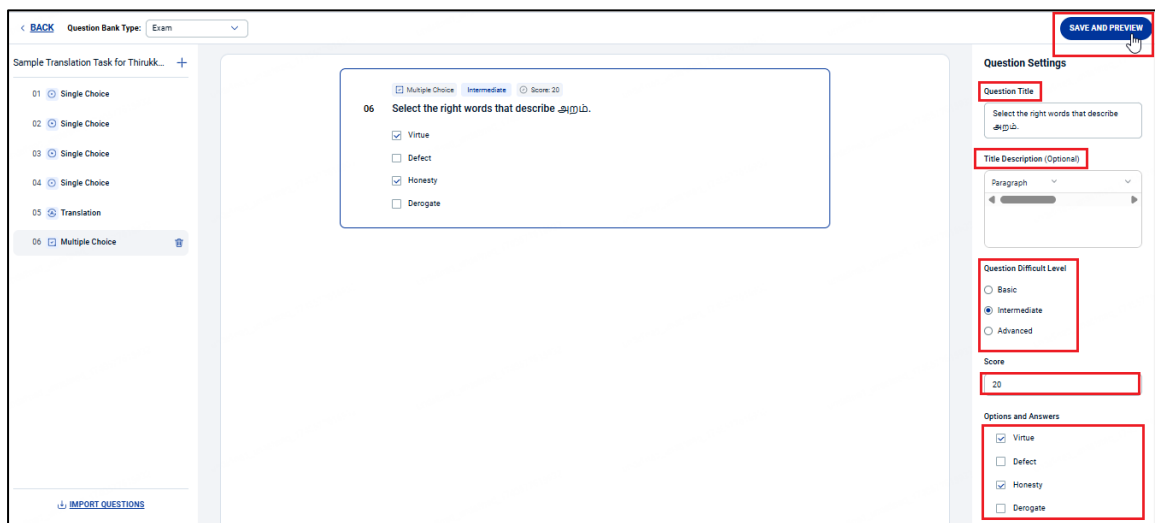

Multiple Choice

Multiple choice questions are used to create questions that require applicants to select multiple right answers.

1. Enter your question in the **Question Title** box.
2. Enter a description if needed.
3. Select **Question Difficulty Level** and, if needed, overwrite the predefined score with your own.

Note: The platform has predefined scores applied to each difficulty level.

- Basic - 10
 - Intermediate - 20
 - Advanced - 30
4. Enter the answer choices in each option box. The platform provides three options by default, and you can click **+Add Option** to include more if needed.
 5. Select the correct options.

The screenshot shows the OneForma interface for creating a question. On the left, a sidebar lists question types: 01 Single Choice, 02 Single Choice, 03 Single Choice, 04 Single Choice, 05 Translation, and 06 Multiple Choice. The main area displays a question configuration for a Multiple Choice question. The question title is "06 Select the right words that describe அறப்பெயர்." The options are: Virtue, Defect, Honesty, and Derogate. The right sidebar shows the "Question Settings" panel with fields for Question Title, Title Description (Optional), Question Difficulty Level (Basic, Intermediate, Advanced), Score (20), and Options and Answers. The "Add Option" button is highlighted at the bottom of the options list.

6. Select the calculation method.

- **Whole-pair scoring:** Points are awarded for choosing all correct answers.
- **Partial scoring:** Points are awarded for choosing the correct answer(s), while points are deducted for choosing the wrong answer.
- **Custom scoring:** Create a custom calculation formula.

Calculate Content

- A: Total number of options
- B: Number of correct options
- C: Positive points for correct options (depends on the selected difficulty level or the custom score assigned to that difficulty level)
- D: Number of incorrect options
- E: Input the negative point to be deducted for incorrect option(s) selected by the applicant.

For example, the question has 5 (A) options available and only 2 (B) correct options. Also, you assign a score of 10 (C). Now, there are 3 (D) incorrect options and a negative point of 2.5 (E) for each incorrect option to be selected by the applicant.

Calculate Formula

Use the five letters, coefficients, and arithmetic symbols to create calculation formulas.

Calculation Methods

Custom scoring method

Calculate Content

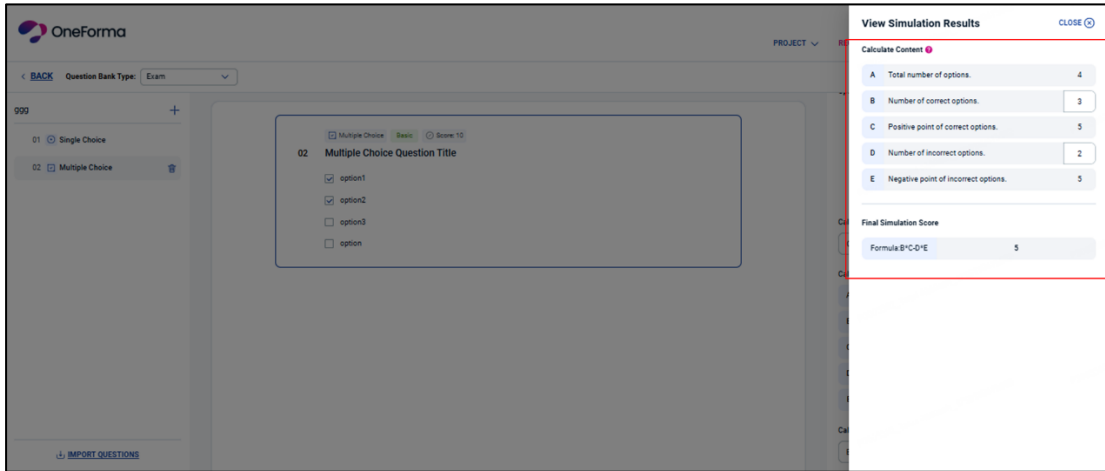

A	Total number of options.	4
B	Number of correct options.	2
C	Positive point of correct options.	5
D	Number of incorrect options.	2
E	Negative point of incorrect options.	5

Calculation Formula ⓘ

B*A-C-D*E

View

Note: Click **View** to see the simulated calculation results. Adjust the calculation content and view the final simulation score.

The screenshot shows the OneForma interface with a question titled "Multiple Choice Question Title" and four options. The simulation results panel on the right displays the following data:

Calculate Content		
A	Total number of options.	4
B	Number of correct options.	3
C	Positive point of correct options.	5
D	Number of incorrect options.	2
E	Negative point of incorrect options.	5

Final Simulation Score
Formula B+C-D+E = 5

Fill in the Blanks

Fill-in-the-blanks questions are used to create questions that require applicants to complete the blanks with right words.

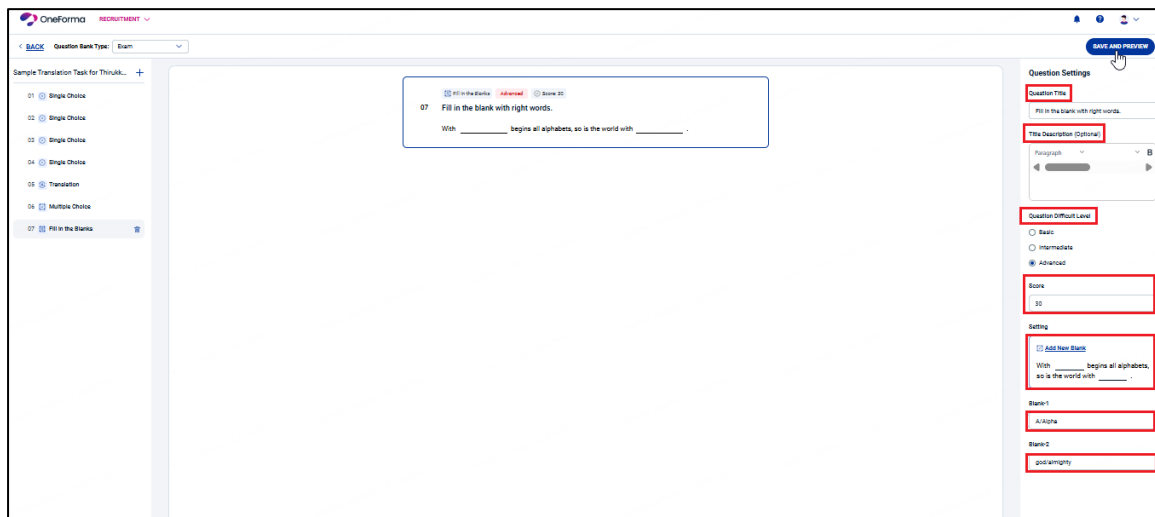

1. Enter your question in the **Question Title** box.
2. Enter a description if needed.
3. Select **Question Difficulty Level** and, if needed, overwrite the predefined score with your own.

Note: The platform has predefined scores applied to each difficulty level.

- Basic - 10
- Intermediate - 20
- Advanced - 30

4. In the **Setting** box, enter your statement with the right blank spaces.
5. Click **Add New Blank** for extra blanks if required.
6. Enter the right answers in the corresponding fields. Ex. **Blank 1** and **Blank 2**.

Note: Answers must be entered in the right sequence.

The screenshot shows the OneForma interface with a question titled "Fill in the blank with right words." and a description. The settings panel on the right displays the following data:

Question Settings	
Question Title	Fill in the blank with right words.
Title Description (Optional)	
Question Difficulty Level	Advanced
Score	30
Setting	Add New Blank
Blank 1	Alibaba
Blank 2	good integrity

Subjective Type Questions

Subjective questions require applicants to provide descriptive or detailed responses, such as Essay, Transcription, and Translation, including Modular question type. You can grade these types of questions in the following ways:

- Manual Grading
- Auto-QA

Essay

The essay type are subjective questions that require applicants to provide detailed, structured, and descriptive responses.

1. Enter your question in the **Question Title** box.
2. Enter a description if needed.
3. Select **Question Difficulty Level** and, if needed, overwrite the predefined score with your own.

Note: The platform has predefined scores applied to each difficulty level.

- Basic - 10
 - Intermediate - 20
 - Advanced - 30
4. The platform has one Type Box section by default. Click **+Add** in the **Type Box section**, if needed, to add additional textboxes for applicant's answer.

The screenshot shows the OneForma question editor interface. On the left, there's a sidebar with a list of question types: 01 Single Choice, 02 Single Choice, 03 Single Choice, 04 Single Choice, and 05 Translation. The main area displays a question titled "08 Write a detailed essay on the section 'MATTER' or பொருள்தகராறு. Follow theme, theme, and relevance." with a score of 40. Below the question is a text input field labeled "Please input your answer". On the right, there's a "Type Box" section with a "+ Add" button and a "DELETE" button. Below this, there's a "Text Area-1" section with a label "Introduction" and a description "The Thirukkural, authored by the ancient Tamil poet-sage".

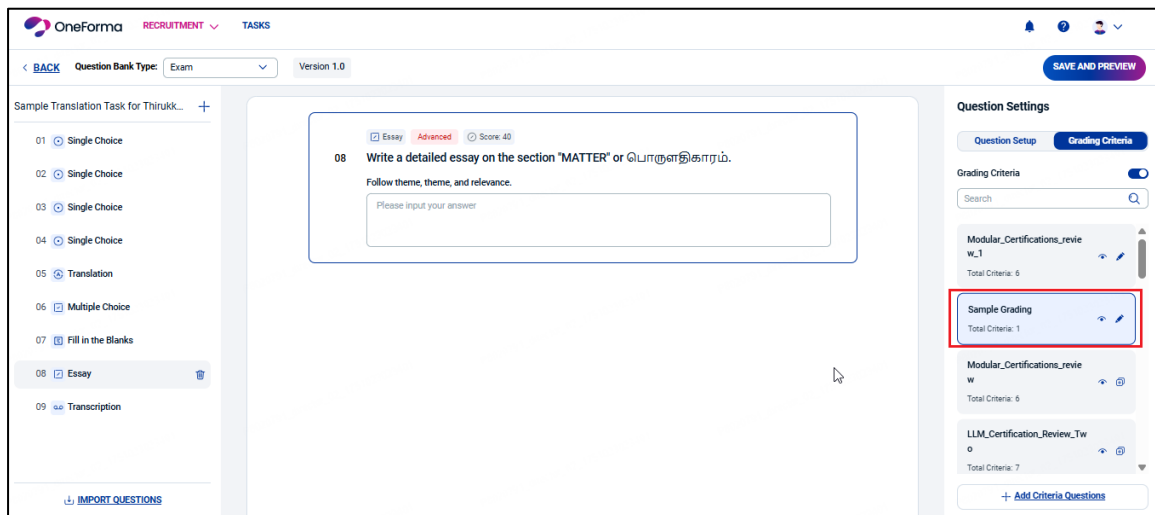

5. Enter a **label** for every **Text Area** you are adding.
6. Choose a method of evaluation: Auto QA or Manual Grading
 - **Auto QA**- Enter the answer in the relevant **Text Area** section. Correct answers should be added here only if you want to enable Auto QA.

Note: The TextArea provides a space for applicants to type their responses.

The answer you enter in this field is not visible to the applicant and is used by the system to calculate the Auto QA score.

- **Manual Grading-** Toggle to the Grading Criteria section to enable manual grading and configure a new criterion or select an existing one.

Note: If Auto QA is toggled on, it will generate a score based on the sample answer provided in the TextArea field. This score is view-only for the SME grader, who will still manually evaluate the answer.

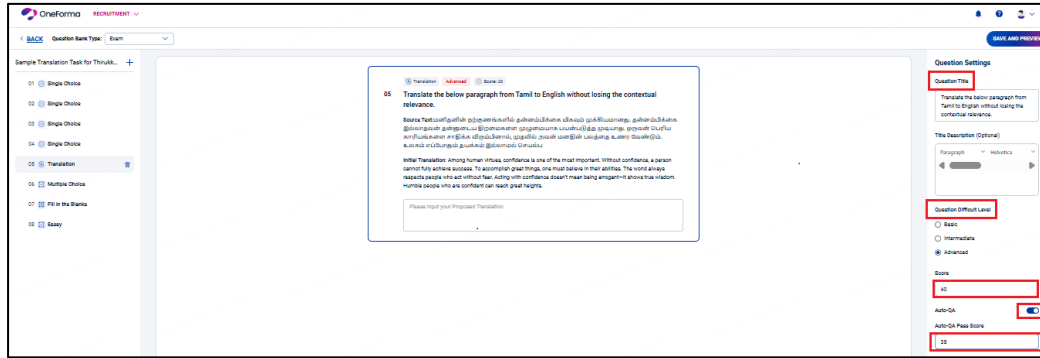

Translation

Translation type are subjective questions that require applicants to convert text from one language to another while preserving meaning, context, and tone.

1. Enter a name for your question for translation in the **Question Title** box.
2. Enter a description if needed.
3. Select **Question Difficulty Level** and, if needed, overwrite the predefined score with your own.

Note: The platform has predefined scores applied to each difficulty level.

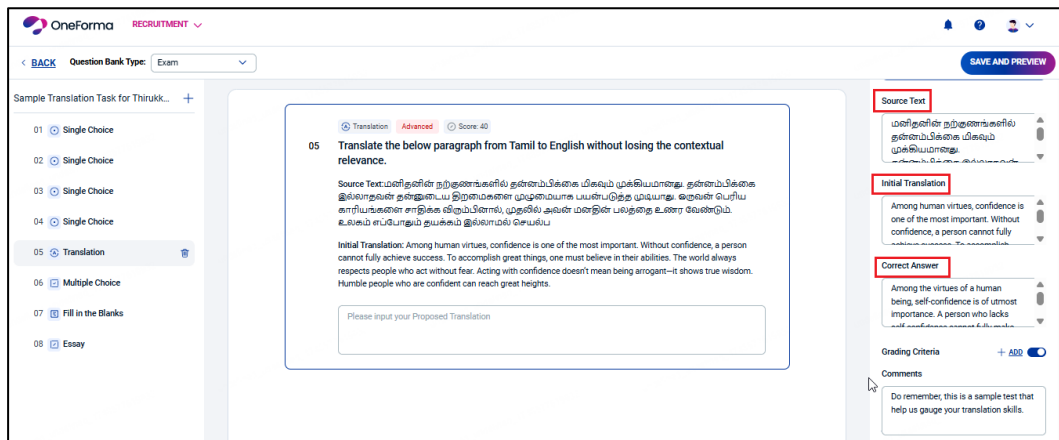

- Basic - 10
- Intermediate - 20
- Advanced - 30

4. Enter the original text in the **Source Text** field, which will serve as the reference for applicants to provide their translations.
5. Enter the draft/initial translation text of target language in the **Initial Translation** section.
7. Choose a method of evaluation: Auto QA or Manual Grading

- **Auto QA-** Enter the actual text of target language or correct answer in the **Correct Answer** section. Correct answers should be added here only if you want to enable Auto QA.

Note: The Correct Answer section provides a space for applicants to type their responses. The answer you enter in this field is not visible to the applicant and is used by the system to calculate the Auto QA score.

- **Manual Grading-** Toggle to the Grading Criteria section to enable manual grading and configure a new criterion or select an existing one.

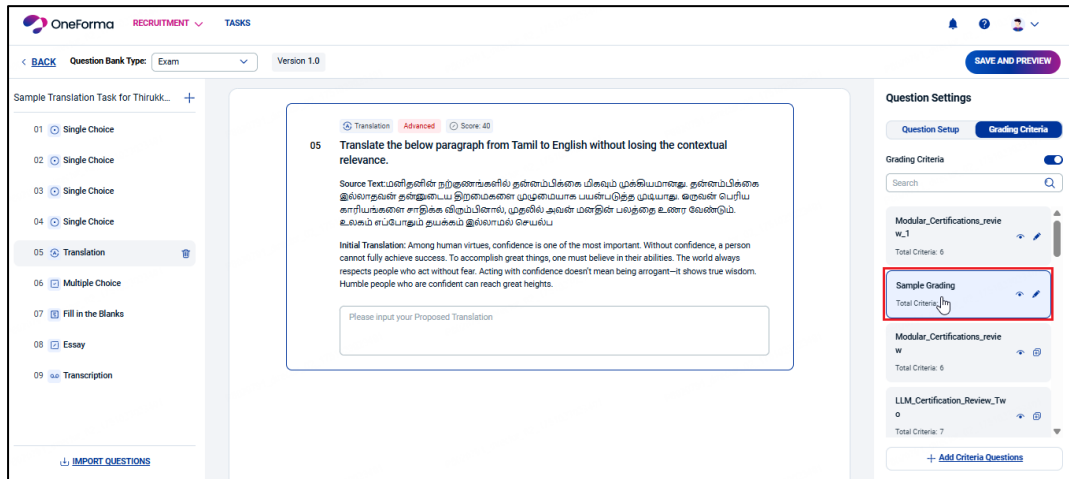

Note: If Auto QA is toggled on, it will generate a score based on the sample answer provided in the Correct Answer field. This score is view-only for the SME grader, who will still manually evaluate the answer.

Transcription

Transcription type are questions that require applicants to produce a text file (verbatim - full/clean/intelligent) of an audio file.

1. Enter your question in the **Question Title** box.
2. Enter a description if needed.

3. Select **Question Difficulty Level** and

d, if

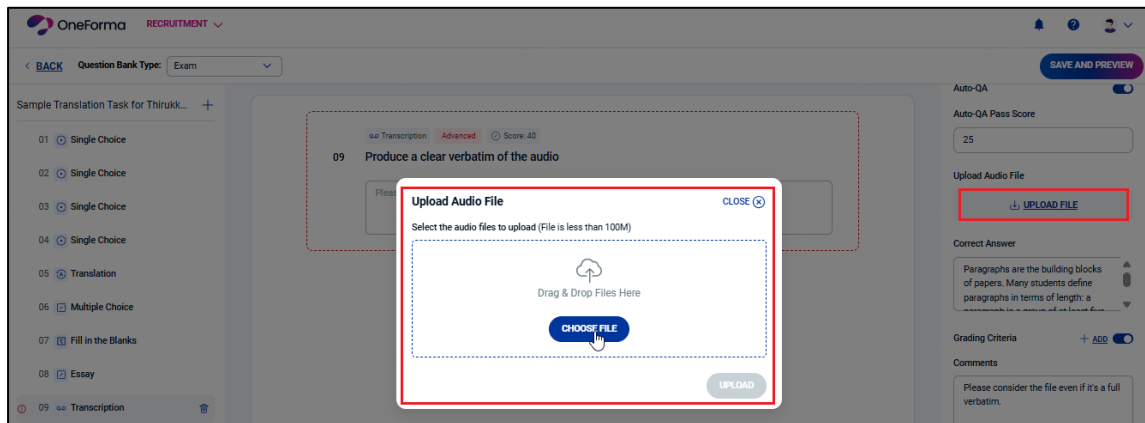

needed, overwrite the predefined score with your own.

Note: The platform has predefined scores applied to each difficulty level.

- Basic - 10
- Intermediate - 20
- Advanced - 30

4. Upload the audio file from your device.

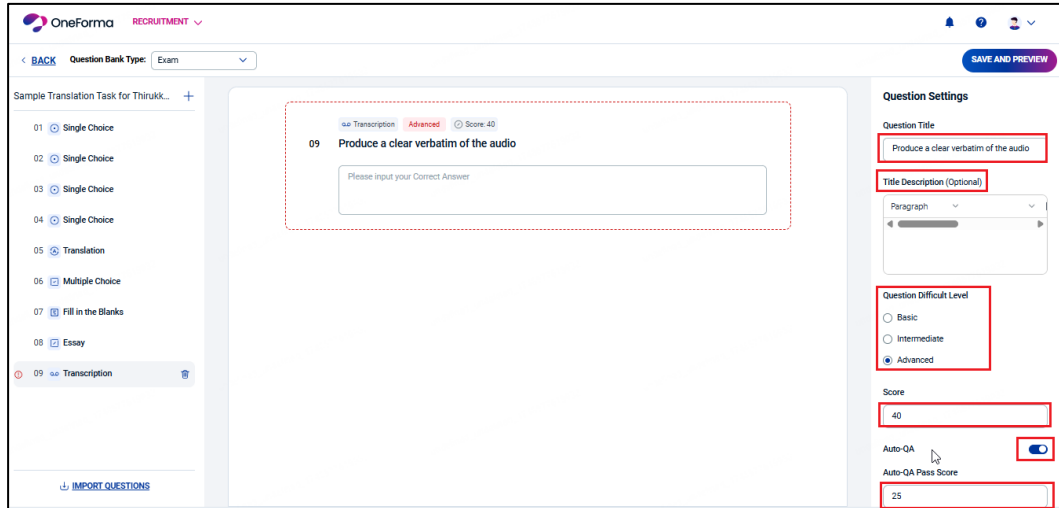

Note: The application only supports **mp3** format.

8. Choose a method of evaluation: Auto QA or Manual Grading

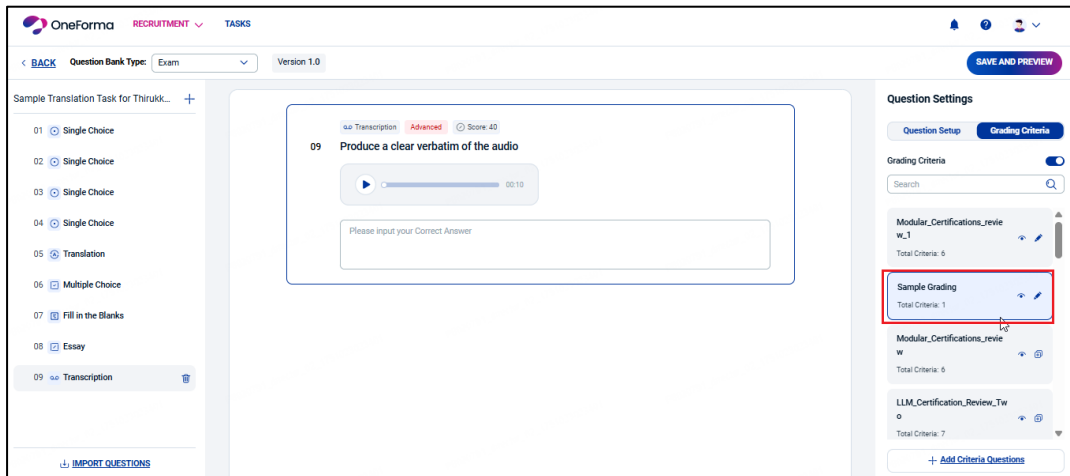

- **Auto QA-** Enter the actual text of target language or correct answer in the **Correct Answer** section. Correct answers should be added here only if you want to enable Auto QA.

Note: The Correct Answer section provides a space for applicants to type their responses. The answer you enter in this field is not visible to the applicant and is used by the system to calculate the Auto QA score.

- **Manual Grading**- Toggle to the Grading Criteria section to enable manual grading and configure a new criterion or select an existing one.

Note: If Auto QA is toggled on, it will generate a score based on the sample answer provided in the Correct Answer field. This score is view-only for the SME grader, who will still manually evaluate the answer.

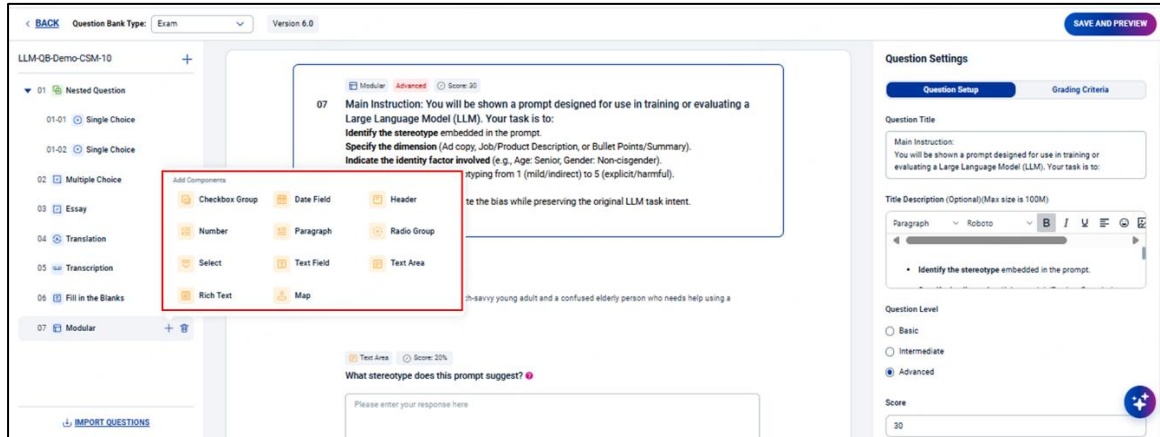

Modular Question

Modular type questions are a type of subjective question that combines multiple smaller questions or components into a single, cohesive assessment module. They allow applicants to respond to several related prompts or tasks within one question framework.

Note: The platform only supports manual grading for **Modular** question type.

1. In the left pane, click **+** next to **Modular**.
2. Select the desired components from the available options to create a modular question.

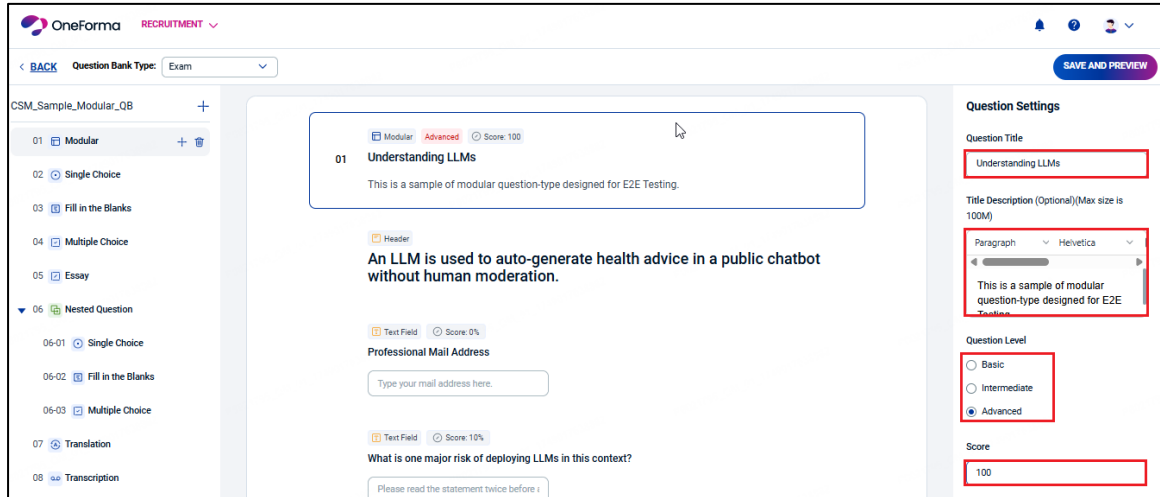

Component Type:

- **Checkbox Group:** Create questions that require applicants to select multiple correct answers.
 - **Date Field:** Create questions that require applicants to select a date.
 - **Header:** Enter a heading or description for your question.
 - **Number:** Create questions that require applicants to write a numerical response.
 - **Paragraph:** Enter paragraph(s) that serve as the basis for all component types. Use the paragraph as the main question and add other components based on it for the applicant to answer.
 - **Radio Group:** Create questions that require applicants to select a correct answer.
 - **Select:** Create questions that require applicants to select multiple options.
 - **Text Field:** Allow applicants to enter their response as a text, password, email, color, range etc. based on the configuration of this component.
 - **Text Area:** Allows applicants to enter their descriptive response.
 - **Rich Text:** Allows applicants to style-format their answers.
 - **Maps:** Allows you to configure map related questions.
3. Enter your question in the **Question Title** box.
 4. Enter a description if needed.
 5. Select **Question Difficulty Level** and, if needed, overwrite the predefined score with your own.

Note: The platform has predefined scores applied to each difficulty level.

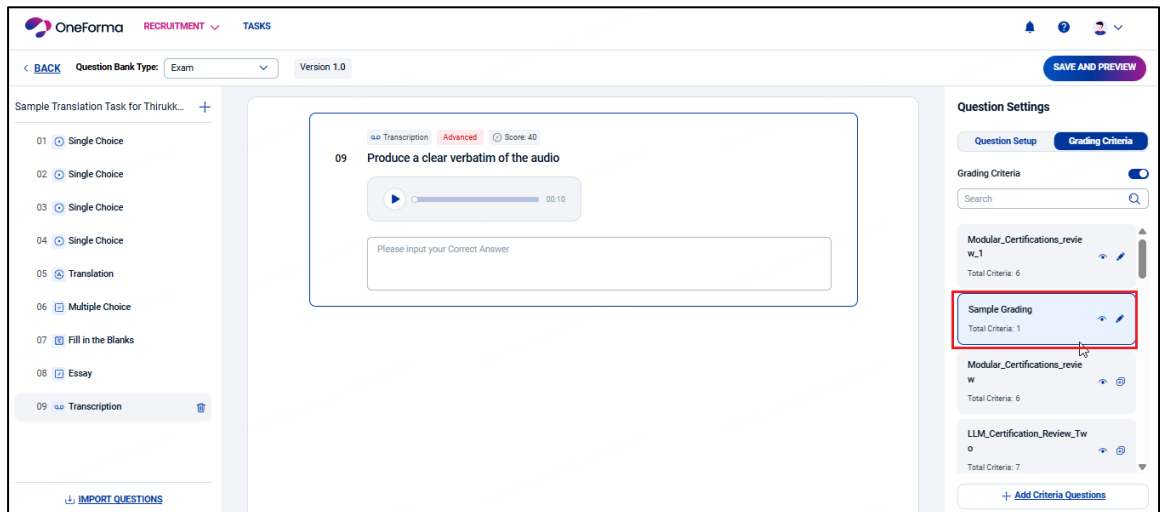

- Basic - 10
- Intermediate - 20
- Advanced – 30

Note: The total percentage of scores for all sub-questions must equal the score in this field.

5. Toggle to the **Grading Criteria** for manual grading.
6. Switch on **Grading Criteria** to enable manual grading.
7. or select an existing criterion from the **Grading Criteria** section.

Note: Modular question type does not support Auto QA.

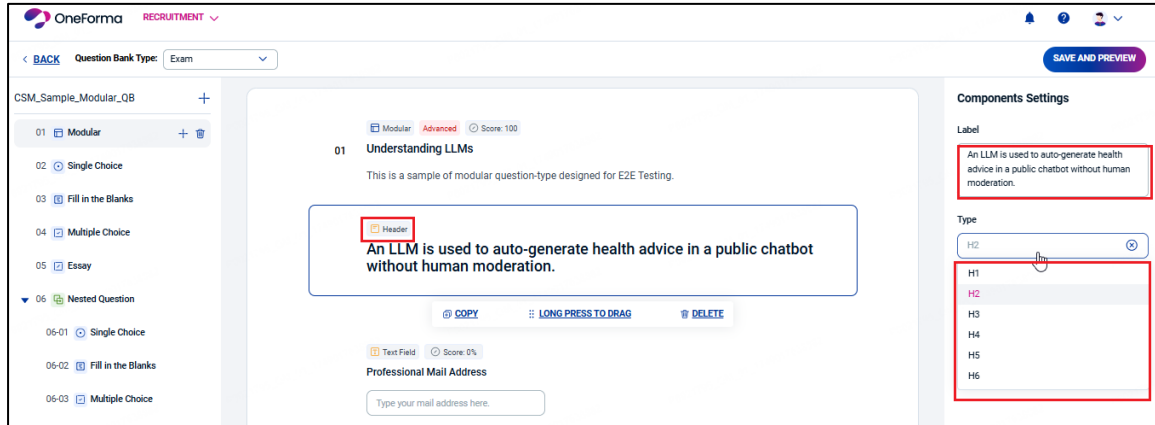

Configure Question Components

You can set up and configure the components within **Modular** question type.

Header

A **header** serves to organize or label sections of the question. It allows you to sequence or group sub-questions logically but does not have a score field, as it is not graded.

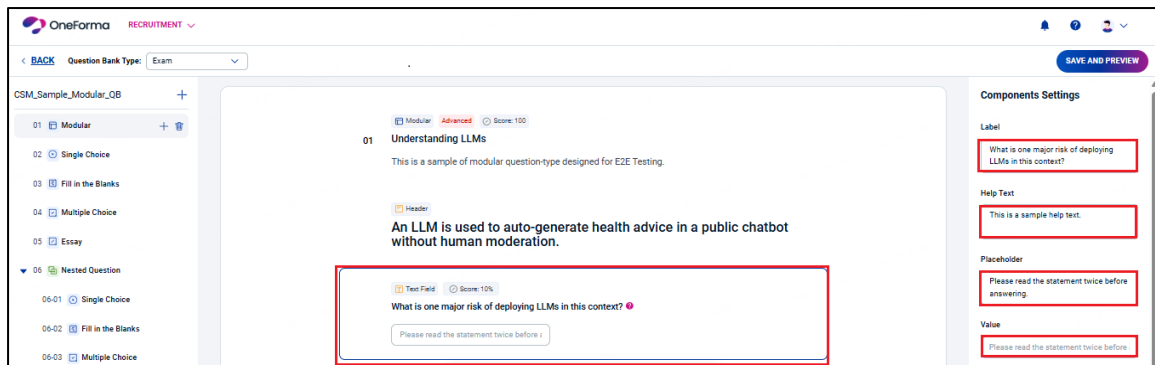

1. Click **Header**.
2. Under **Component Settings**, enter title in the **Label** field.
3. Select a **Type** for the heading from the drop-down.

Text Field

A **Text Field** component allows applicants to provide short, concise answers in a single-line or limited text box. It is typically used for brief responses rather than detailed explanations.

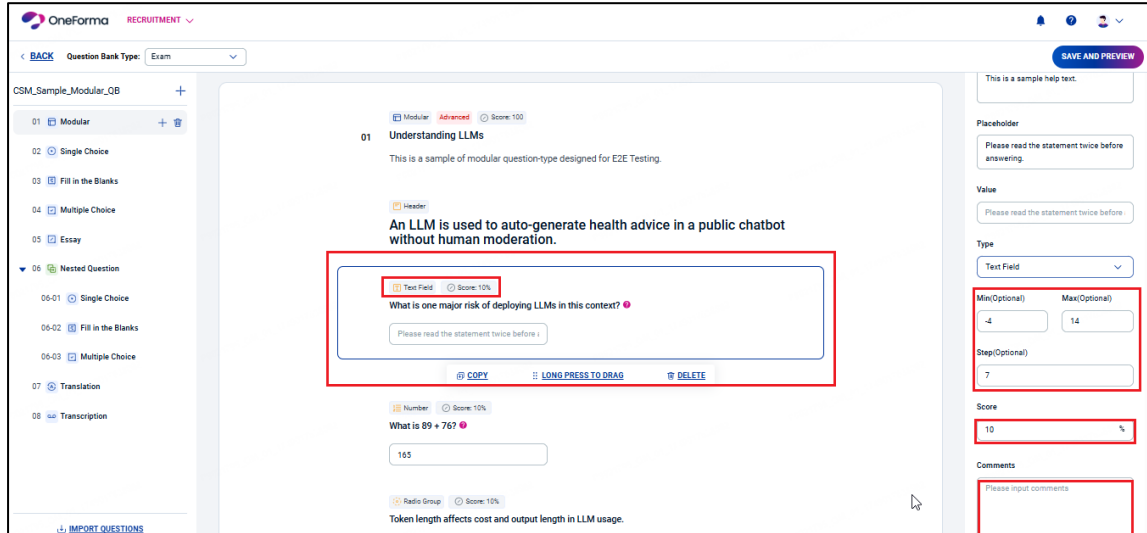

1. Click **Text Field**.
2. Under **Component Settings**, type your question in the **Label** field.
3. Enter **Help Text** and **Placeholder** text if needed.
4. Enter or paste your answer in the **Value** field.

5. Select the type of **Text Field** from the drop-down.
 - **Text Field**: Allows you to enter strings in the **Value** field.
 - **Password**: Allows applicants to enter password if needed.
 - **Email**: Allows applicants to enter email IDs if needed.
 - **Color**: Allows applicants to choose a color.
 - **Tel**: Allows applicants to enter telephone or mobile number.
 - **Range**: Allows you to create ranking questions using scale.
 - Set **Min**, **Max**, and **Step** values if needed.
 - **Min**: Defines the lowest range
 - **Max**: Defines the highest range
 - **Step**: Number of the steps within a range value

For example, if you want the applicant to rank a feature on the scale of 1 to 10, 1 is set as the **Min** value and 10 is set as the **Max** value. Setting **Step** as 2 will limit applicants to select ranges in the multiples of 2.

6. Enter **Score** percentage.
7. Enter **Comments** if needed.

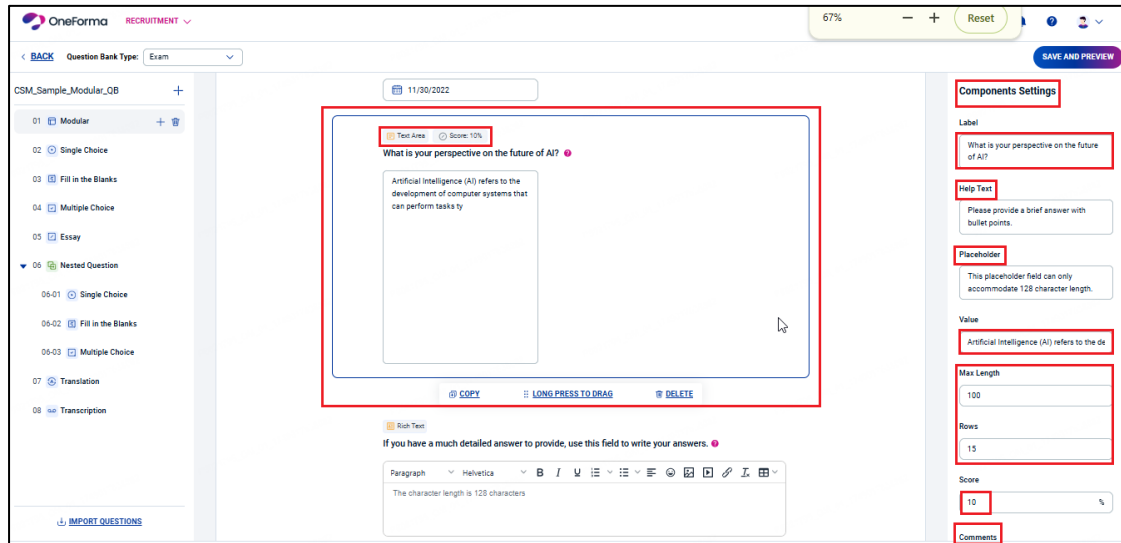

The screenshot shows the OneForma Recruitment interface. On the left, there's a sidebar with a list of question types: 01 Modular, 02 Single Choice, 03 Fill in the Blanks, 04 Multiple Choice, 05 Essay, 06 Nested Question, 06-01 Single Choice, 06-02 Fill in the Blanks, 06-03 Multiple Choice, 07 Translation, and 08 Transcription. The main area displays a question titled 'Understanding LLMs' with a text field for the answer. The right sidebar shows settings for the question, including Placeholder, Value, Type (Text Field), Min/Max/Step values, Score (10%), and Comments.

Text Area

You can create questions that require applicants to answer the questions briefly.

1. Click **Text Area**.
2. Under **Component Settings**, type your question in the **Label** field.
3. Enter **Help Text** and **Placeholder** text if needed.
4. Enter or paste your answer in the **Value** field.
5. Enter **Max Length** and **Rows**.
 - **Max Length:** Set limitations for number of words.
 - **Rows:** Set size limitation of the text field.
6. Enter **Score** percentage.
7. Enter **Comments** if needed.

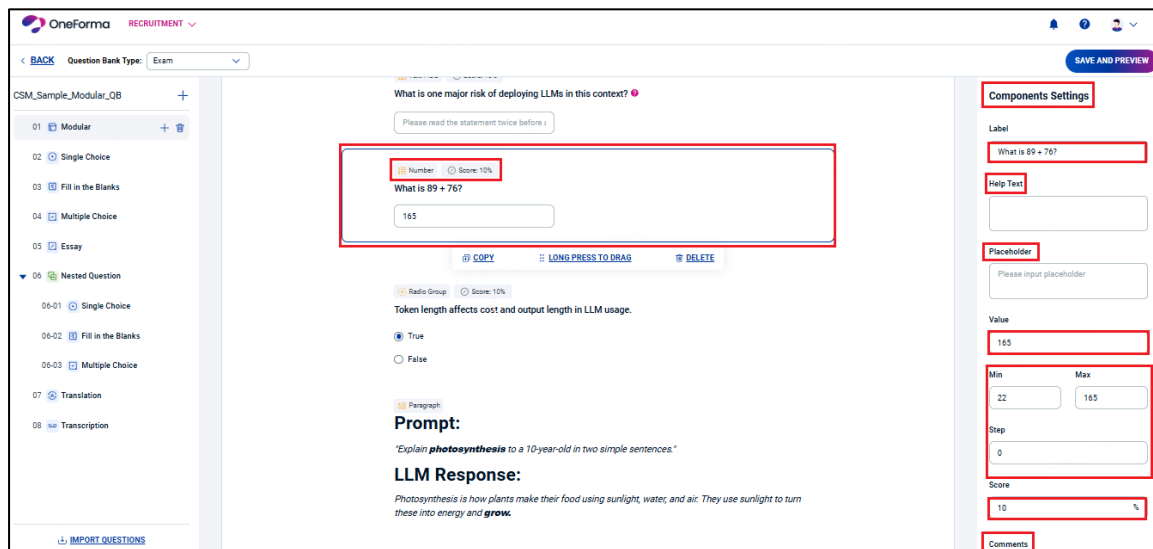

The screenshot shows the OneForma interface for creating a question. The question type is 'Text Area' with a score of 10%. The question text is 'What is your perspective on the future of AI?'. The help text is 'Please provide a brief answer with bullet points.' The placeholder text is 'This placeholder field can only accommodate 128 character length.' The value field is 'Artificial Intelligence (AI) refers to the development of computer systems that can perform tasks by'. The max length is 100, rows are 15, and the score is 10%. The components settings are visible on the right.

Number

You can create questions that require applicants to provide numeric answers.

1. Click **Number**.
2. Under **Component Settings**, type your question in the **Label** field.
3. Enter **Help Text** and **Placeholder** text if needed.
4. Enter or set your answer in the **Value** field.
5. Set Min, Max, and Step values if needed.
6. Enter **Score** percentage.
7. Enter **Comments** if needed.

The screenshot shows the OneForma interface for creating a question. The question type is 'Number' with a score of 10%. The question text is 'What is 89 + 76?'. The help text is 'Please read the statement twice before I'. The placeholder text is 'Please input placeholder'. The value field is '165'. The min value is 22, the max value is 165, and the step value is 0. The score is 10%. The components settings are visible on the right.

Paragraph

You can add sections that provides a passage or text for the applicant to read. It serves as the basis for one or more sub-questions, which the applicant answers based on the information in the paragraph. It allows you to sequence or group sub-questions logically but does not have a score field, as it is not graded.

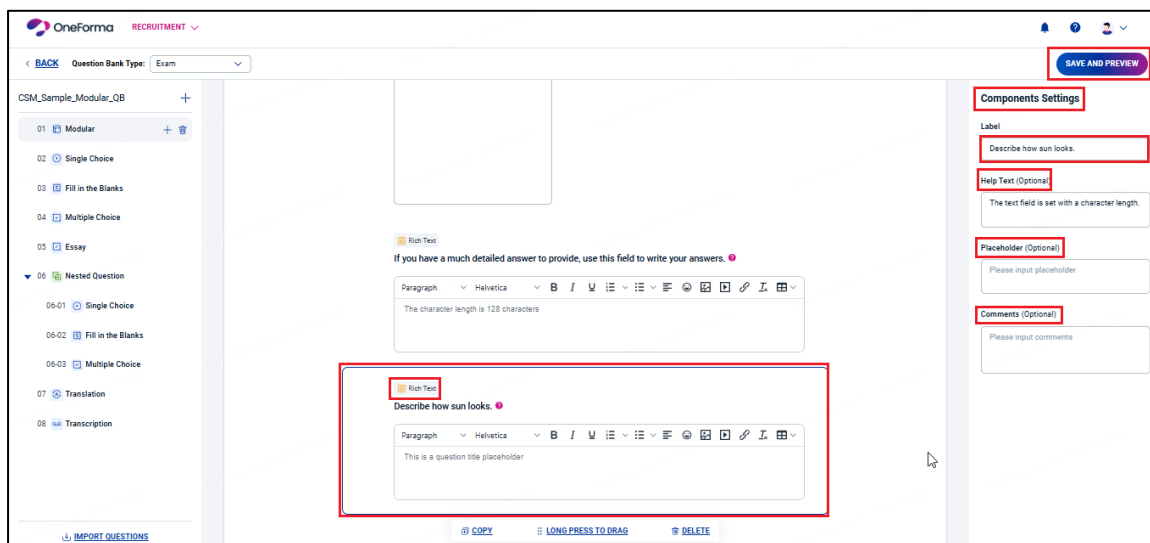

1. Click **Paragraph**.
2. Under **Component Settings**, type or paste your paragraph and format it as required.

Rich Text

You can add this component allows applicants to provide formatted text responses, including elements like bold, italics, bullet points, and hyperlinks. You can use it when answers require more than plain text and may include structured or styled content. It allows you to sequence or group sub-questions logically but does not have a score field, as it is not graded.

1. Click **Rich Text**.
2. Under **Component Settings**, type your question in the **Label** field.
3. Enter **Help Text**, **Placeholder text**, and **Comments** if needed.

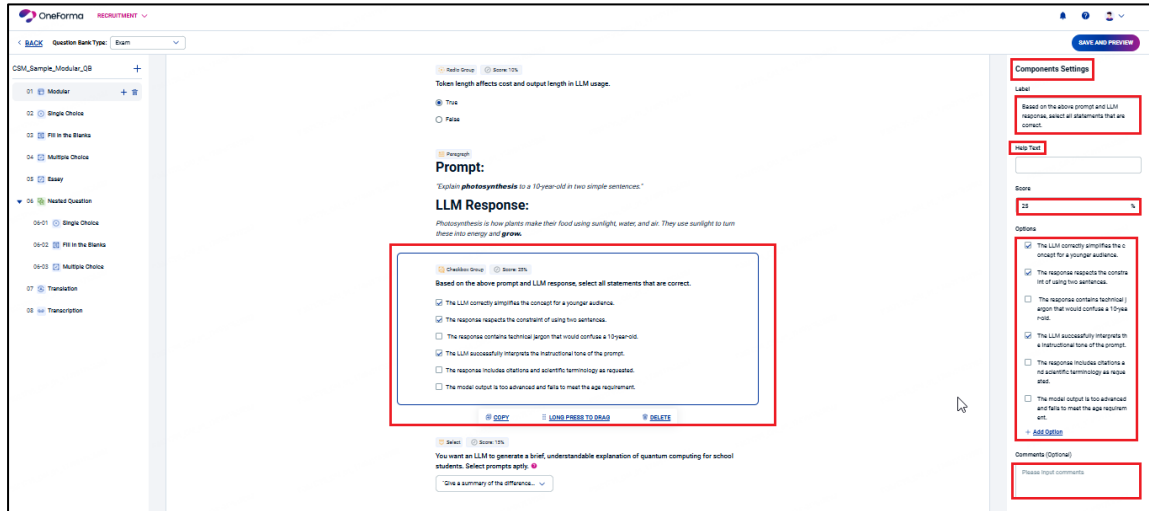

Checkbox Group

You can create a question that requires applicants to multi select correct answers, based on the configured question.

1. Select **Checkbox Group**.
2. Under **Component Settings**, type your question in the **Label** field.
3. Enter **Help Text** if needed.
4. Enter the score percentage.

- Enter all the options and select the options with correct answers.
- Click **Add Option** to add extra options if needed.

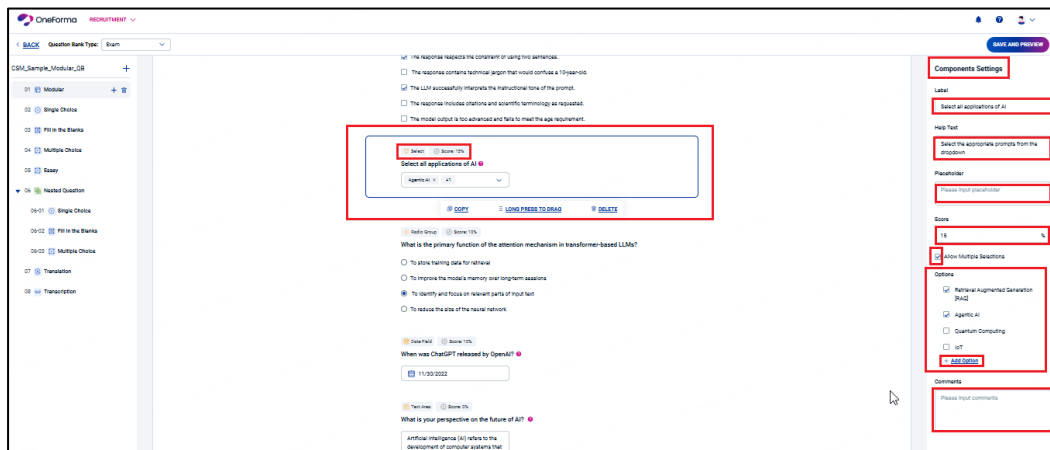

- Enter **Comments** if required.
- Select the calculation method.

Select

You can create questions that require applicants to either single-select or multi-select answers from a drop-down list.

- Click **Select**.
- Under **Component Settings**, type your question in the **Label** field.
- Enter **Help Text** and **Placeholder** text if needed.
- Enter the score percentage.
- Select **Allow Multiple Selections** to convert the question into multi-select type. If you choose this option, you will get the option to select the calculation method.
- Enter all the options and click **Add Option** to add extra options if needed.
- Select the correct options.
- Enter **Comments** if required.

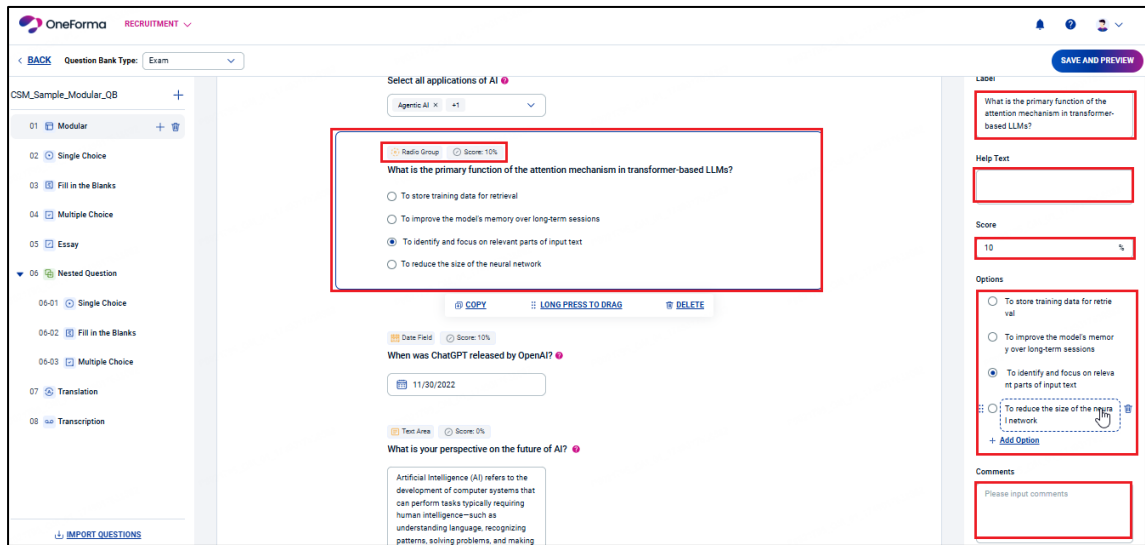

- Select the calculation method. if you have allowed multiple selections.

Radio Group

You can create questions that require applicants to single-select answers.

1. Click **Radio Group**.
2. Under **Component Settings**, type your question in the **Label** field.
3. Enter **Help Text** if needed.
4. Enter the score percentage.
5. Enter all the options and click **Add Option** to add extra options if needed.
6. Select the correct option.
7. Enter **Comments** if required

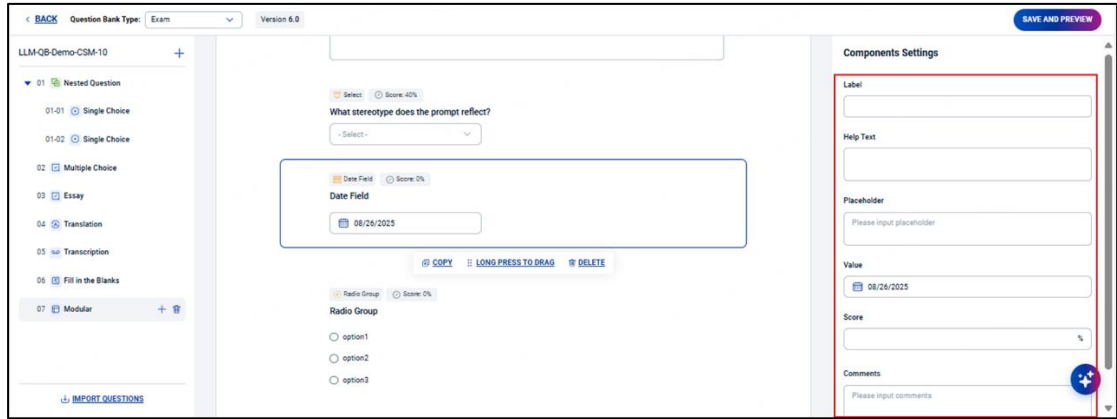

The screenshot shows the OneForma interface for creating a question. On the left, a sidebar lists question types: Modular, Single Choice, Fill in the Blanks, Multiple Choice, Essay, Nested Question, Single Choice, Fill in the Blanks, Multiple Choice, Translation, and Transcription. The main area displays a 'Radio Group' question configuration. The question label is 'What is the primary function of the attention mechanism in transformer-based LLMs?'. Below the label, there are four radio button options: 'To store training data for retrieval', 'To improve the model's memory over long-term sessions', 'To identify and focus on relevant parts of input text' (which is selected), and 'To reduce the size of the neural network'. The score is set to 10%. To the right, there are fields for 'Help Text', 'Score' (10%), 'Options' (with a list of the same four options), and 'Comments' (with a placeholder 'Please input comments'). At the bottom, there is a 'Date Field' question configuration with the label 'When was ChatGPT released by OpenAI?', a date value of '11/30/2022', and a score of 10%.

Date

You can create questions that require applicants to provide a response in the form of a date.

1. Select **Date Field**.
2. Under **Component Settings**, type your question in the **Label** field.
3. Enter **Help Text** and **Placeholder** text if needed.
4. Enter Date value in the value field.
5. Enter the score percentage.
6. Enter **Comments** if required.

Maps

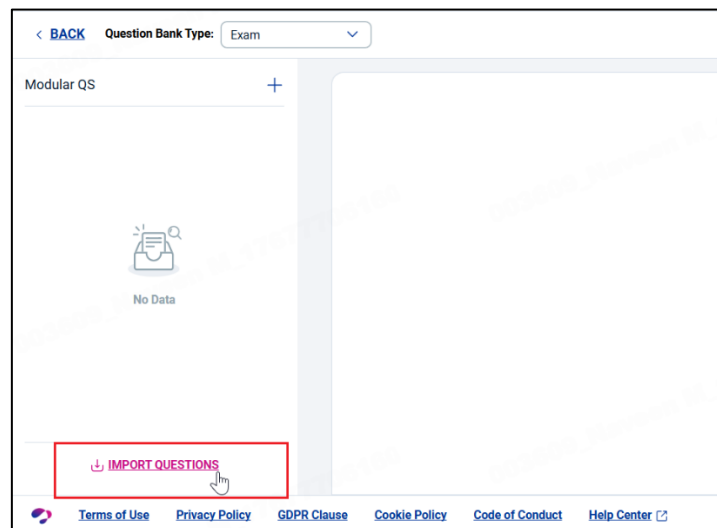

You can add maps type questions for applicants to answer.

1. Select Maps
2. Under **Component Setting**, type your question in the **Label** field.
3. Enter Google map URL to add maps related questions
 Note: Copy the URI after <https://www.google.com/maps/> and paste it the given field.
 An instant preview of the location will be displayed.

Import Modular Questions

You can import multiple modular questions into a question bank using a template.

1. On the left configuration pane, click **Import Questions**.

2. Navigate to the **Download Template** drop-down and select **Modular Template**.

3. Read the instructions and fill in the questions.

Instructions:

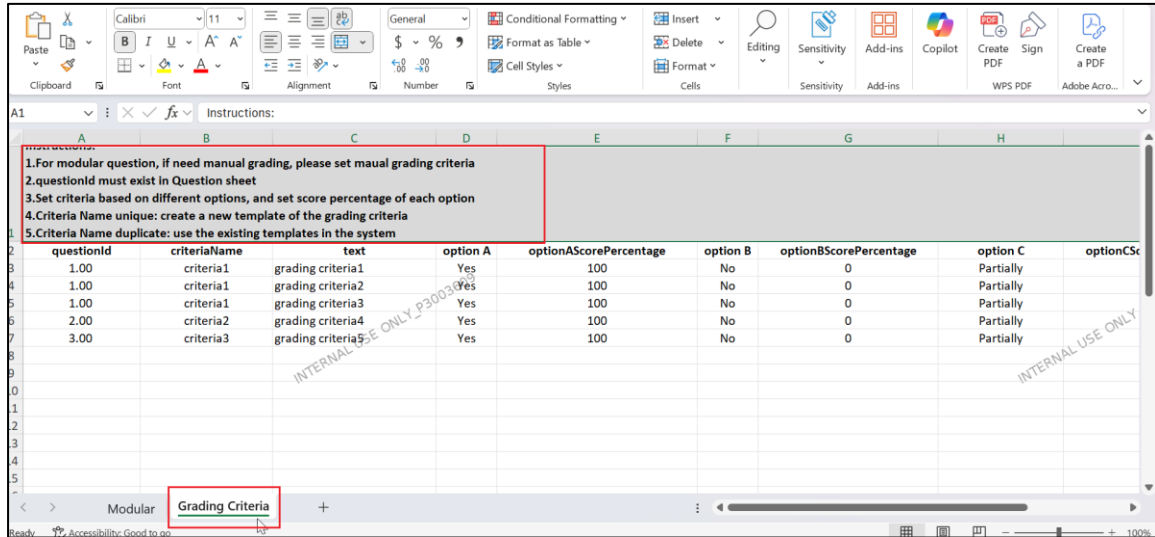

- Please use this template to upload modular question with types: Checkbox Group, Date Field, Header, Number, Paragraph, Radio Group, Select, Text Field, Text Area, Rich Text, Map.
- For Modular Question, need to add components with weight(scorePercentage)
- Please delete the examples below before uploading
- Checkbox Group need to be selected the calculation method, such as whole-pair scoring method, partial scoring method and custom scoring method.
- whole-pair scoring method:
Question: Select all correct options (correct answers are A, B, C).
Candidate chooses A, B, C → full marks (e.g. 5).
Candidate chooses A, B or A, B, C, D → 0 marks.
- partial scoring method (with negative points for each incorrect answer):
Question: The correct answers are A, B and C (3 correct choices, total 6 points).

Nested Question

Nested questions contain multiple sub-questions within a single main question, making it a complete assessment module.

Note: Both automatic and manual grading are supported, but manual grading is recommended.

Adjust Order, Copy, and Delete Questions

For modular and nested question types, you can rearrange, duplicate, or delete questions from the left and center panes.

Question Type	Operations
---------------	------------

Modular	Rearrange, copy, or delete question components from the center pane.
Nested	Rearrange, copy, or delete questions from the center pane. Note: You cannot move sub-questions from one nested question to another.

Manage Question Bank

Edit Question Bank

If you are the creator or Question Bank Manager, you can edit the Question Bank. The ellipsis menu under the **Action** column is enabled only for the creator of the Question Bank and Question Bank managers.

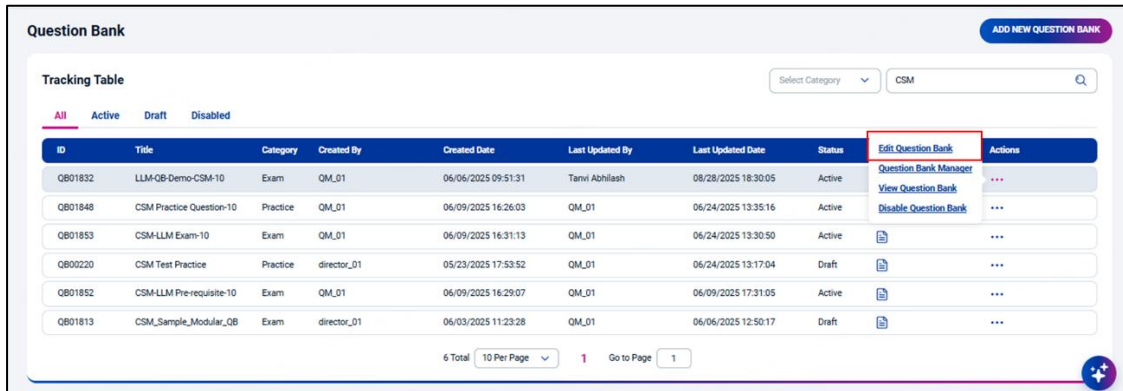

Note:

- Only the creator and QB managers have access to QB.
- Anyone who has edit access to the QB must save and publish it after making changes to it. The republished question bank is updated with a new version control number.
- Failing to do so prevents anyone from accessing the QB.

1. Locate the relevant QB.
2. From the **Actions** column, click **ellipsis**.
3. Select **Edit Question Bank**.

If you switch to a different menu during Question Bank creation, the application pops up a dialog box.

4. After editing, click **Save and Preview**.
5. Click **Publish**, then click **Yes** to confirm.

Download QB Template

While editing a question bank, you can download the QB Template to save a local copy of all the questions in the QB in your machine in the excel format. This allows you to make any changes to the QB in the Excel file and then upload the same back to the system.

The **Download QB Template** button includes a dropdown that displays download links based on the question types available in the question bank — **Standard Question Template**, **Modular Question Template**, or both.

1. Click the arrow next to the **Download QB Template** button.
2. Select the template as per the availability.
 - Standard Question Template
 - Modular Question template

The screenshot shows the 'Question Bank Preview' page. On the right side, there are buttons for 'GO TO EDIT' and 'PUBLISH'. Below them is a 'DOWNLOAD QB TEMPLATE' button with a dropdown arrow. The dropdown menu is open, showing two options: 'Standard Question Template' and 'Modular Question Template'. The main content area shows a preview of a question bank titled 'Test_Auto_QB' with a list of questions on the left and a detailed view of a 'Mandatory--Nested Question Title1' on the right.

The questions will be downloaded in the Excel format for you to edit.

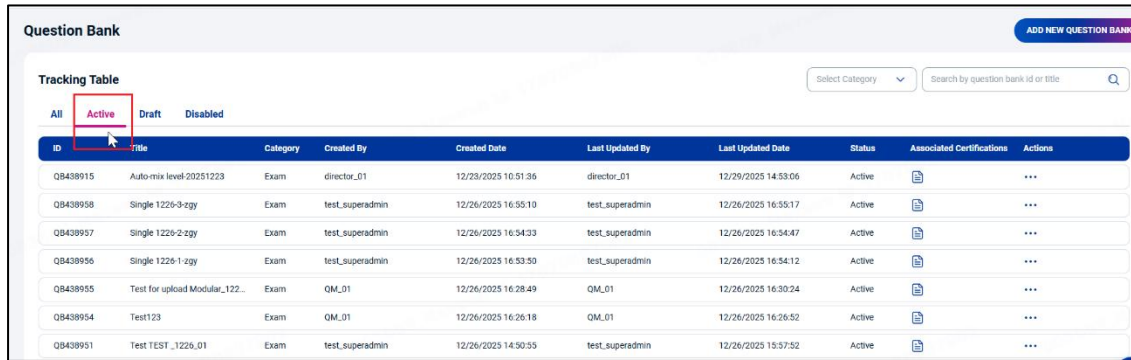

3. Click **Publish**.

Clone Question Bank

As a recruiter or L&D personnel, you can clone any active question bank available in OneForma. The cloned Question Bank will be named in the following manner: **original question bank name_1**.

Cloning a question bank will create a copy of the entire question bank. The operation also clones the question bank managers if the question bank to be cloned has one. However, you can add new question bank managers to the cloned question bank.

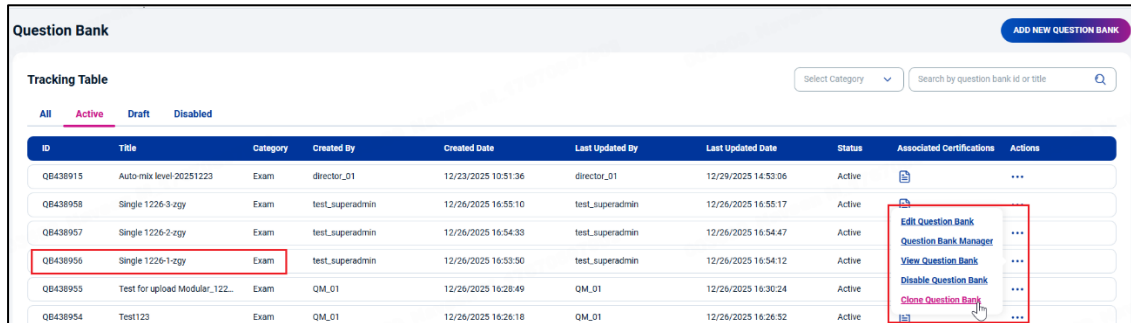

After you reach the Question Bank tracking table, navigate to the **Active** tab.

The screenshot shows the 'Question Bank' interface with the 'Tracking Table' tab active. The 'Active' tab is highlighted in the top navigation bar. The table below lists various question banks with columns for ID, Title, Category, Created By, Created Date, Last Updated By, Last Updated Date, Status, Associated Certifications, and Actions.

ID	Title	Category	Created By	Created Date	Last Updated By	Last Updated Date	Status	Associated Certifications	Actions
QB438915	Auto-mix level 20251223	Exam	director_01	12/23/2025 10:51:36	director_01	12/29/2025 14:53:06	Active		...

Download QB Template

While viewing a question bank, you can download the QB Template to save a local copy of all the questions in the QB in your machine in the excel format. This allows you to make any changes to the QB in the Excel file and then upload the same back to the system.

The **Download QB Template** button includes a dropdown that displays download links based on the question types available in the question bank — **Standard Question Template**, **Modular Question Template**, or both.

3. Click the arrow next to the **Download QB Template** button.
4. Select the template as per the availability.
 - Standard Question Template
 - Modular Question template

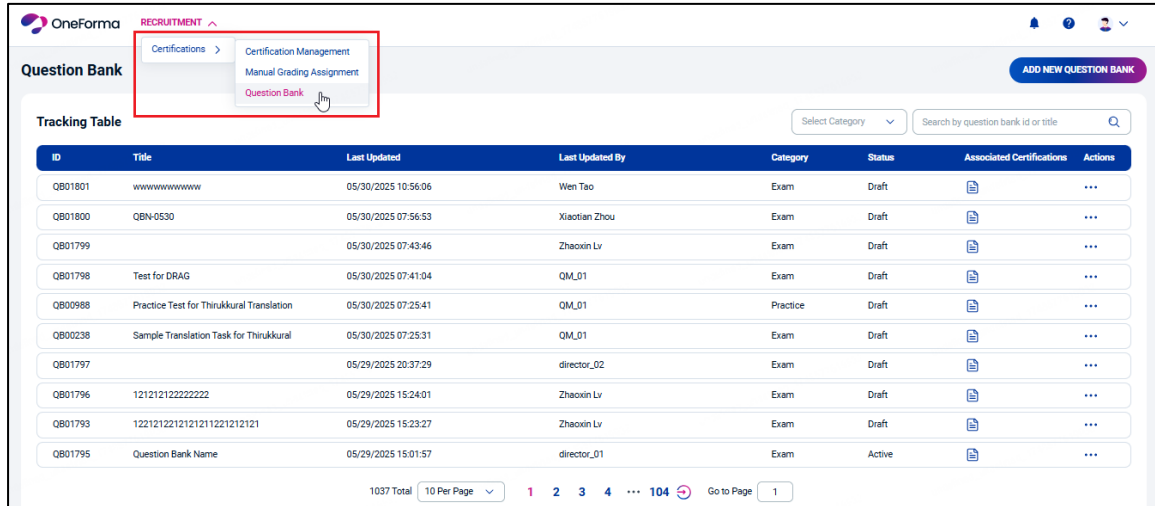

The questions will be downloaded in the Excel format for you to edit.

Add Question Bank Manager

After you create a question bank, you can add members as Question Bank managers for them to manage the question bank.

Notes: A Question Bank manager has the same access and permissions as the creator.

1. Navigate to the **Recruitment** module.
2. Select **Certifications** and click **Question Bank**.

Question Bank Version Control

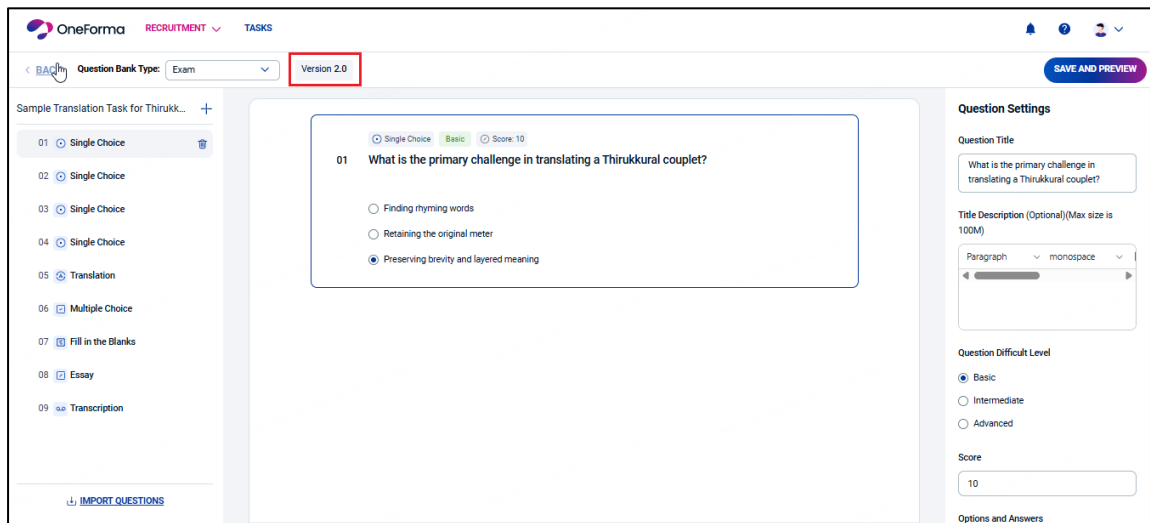

Version control is enabled for all Question Banks. Each time a QB is published, its version number increments automatically. However, the platform does not allow rolling back to a previous version once it has been updated.

1. In the edit mode, view the initial version of the QB.

The screenshot shows the OneForma interface in edit mode. At the top, the 'Question Bank Type' is set to 'Exam' and the 'Version' is '1.0', which is highlighted with a red box. The main content area displays a sample translation task for Thirukkural. The task is a single-choice question with three options: 'Finding rhyming words', 'Retaining the original meter', and 'Preserving brevity and layered meaning'. The 'Preserving brevity and layered meaning' option is selected. The 'Question Settings' panel on the right shows the question title, title description, question difficulty level (Basic), and score (10).

2. After the QB is published, check the version of QB.

The screenshot shows the OneForma interface in edit mode after the question bank has been published. The 'Version' is now '2.0', which is highlighted with a red box. The main content area and 'Question Settings' panel are identical to the previous screenshot, showing the same sample translation task and settings.

Certification Management

As a recruitment manager, you can create certifications, assign SMEs, and add resources to the certification, while tracking those throughout the process.

The **Certification Table** shows details of all certifications hosted on OneForma.

- **All** – View certifications that are in active, draft, and disabled mode.
- **Active** – View active certifications.
- **Closed** – View certifications that are no longer active.

Set-up Certification (1)

You can create certification assessments based on the categories of certification, such as Audio Transcription, Translation, LLM, Language Testing, and so on.

Basic Information

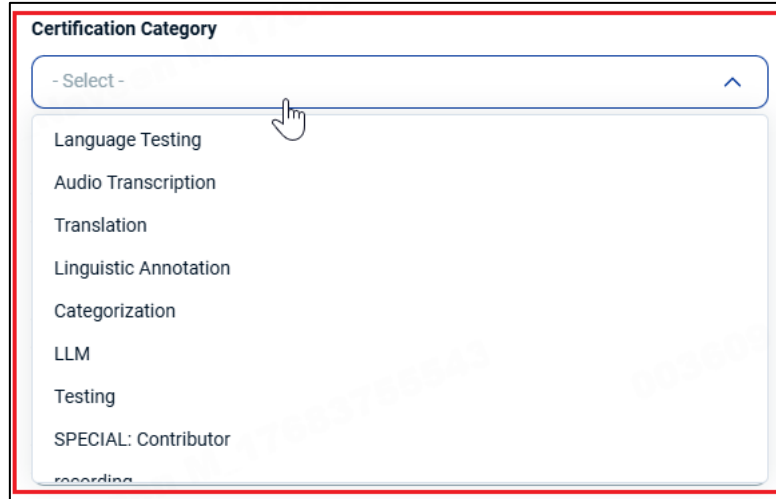

You will set-up all the basic details of the certification.

1. Enter basic information into the relevant fields.
 - **Certification Platform:** The system automatically captures the name of certification hosting platform.
 - **Certification Name:** Type a relevant name.

- **Certification Version:** The system automatically captures each version of the certification.
- **Certification Description:** Type a description relevant to certification.

Certification Category

1. Select the relevant certification category from the drop-down.

A screenshot of a web form titled "Certification Category". It features a dropdown menu with a blue border and a blue arrow icon on the right. The menu is open, showing a list of categories: "- Select -", "Language Testing", "Audio Transcription", "Translation", "Linguistic Annotation", "Categorization", "LLM", "Testing", "SPECIAL: Contributor", and "recording". A hand cursor is pointing at the "Language Testing" option.

Certification Category

- Select -

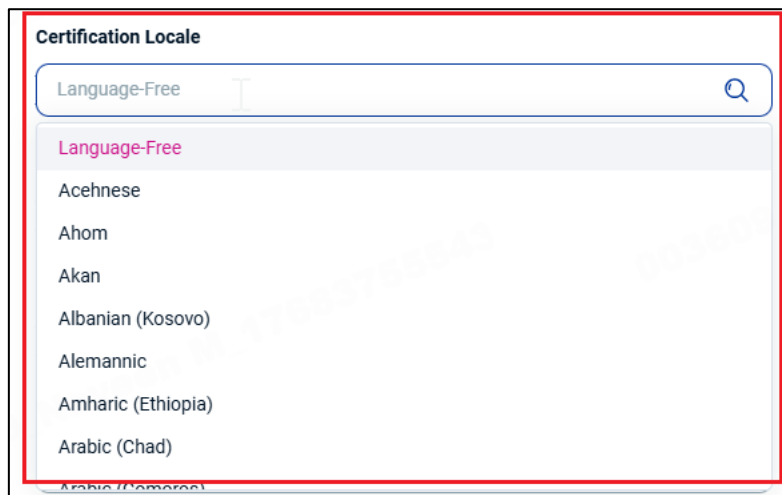

- Language Testing
- Audio Transcription
- Translation
- Linguistic Annotation
- Categorization
- LLM
- Testing
- SPECIAL: Contributor
- recording

Language Certification Assessment

For certification related to testing **Language Proficiency**, you must select **Language Testing** under **Certification Category** and the relevant language under **Certification Locale**.

Certification Locale

1. Select the relevant locale (language) used in the certification.

A screenshot of a web form titled "Certification Locale". It features a search bar with a magnifying glass icon on the right. Below the search bar is a list of locales: "Language-Free", "Acehnese", "Ahom", "Akan", "Albanian (Kosovo)", "Alemannic", "Amharic (Ethiopia)", and "Arabic (Chad)". The "Language-Free" option is highlighted in pink.

Certification Locale

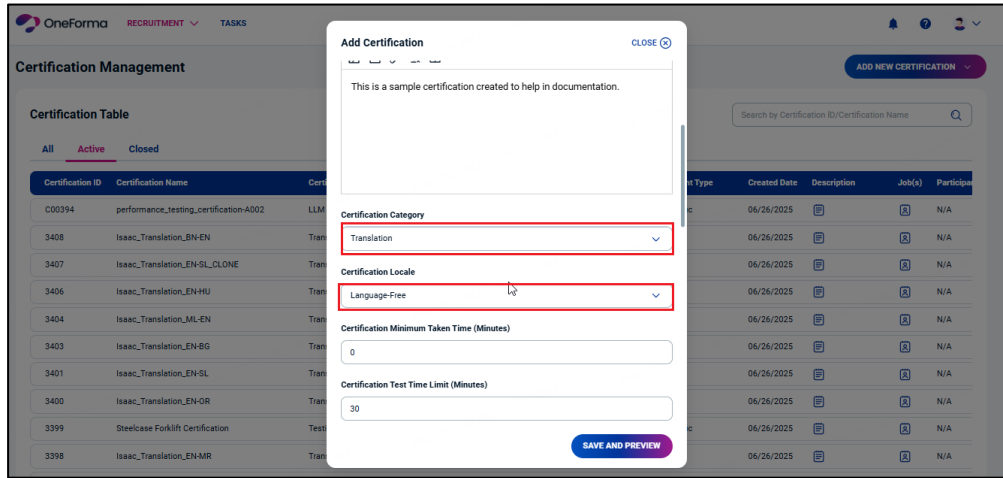

Language-Free

- Language-Free
- Acehnese
- Ahom
- Akan
- Albanian (Kosovo)
- Alemannic
- Amharic (Ethiopia)
- Arabic (Chad)

Note:

- The applicant can only apply for certifications that match their locale, provided during onboarding.

- When you select **Language-Free** as the option, the certification becomes available to all the applicants.

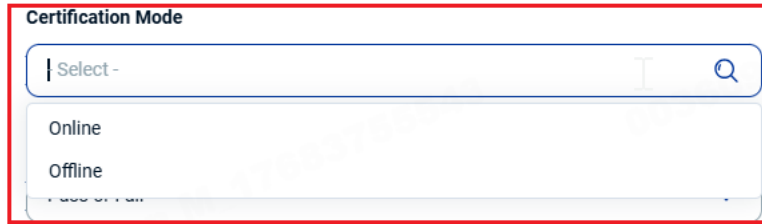

The screenshot displays the 'Add Certification' modal form in the OneForma system. The form is overlaid on a 'Certification Management' page. The modal contains the following fields:

- Certification Category:** A dropdown menu with 'Translation' selected.
- Certification Locale:** A dropdown menu with 'Language-Free' selected.
- Certification Minimum Taken Time (Minutes):** A text input field with the value '0'.
- Certification Test Time Limit (Minutes):** A text input field with the value '30'.

At the bottom right of the modal is a 'SAVE AND PREVIEW' button. The background shows a 'Certification Table' with columns for Certification ID, Certification Name, and Certification Type. The table lists various certifications, including 'performance_testing_certification-A002' and several 'Isaac_Translation' entries.

Certification Mode

1. Select the relevant mode of certification.

Online

Select **online** if the assessment needs to be taken on the OneForma platform (digital).

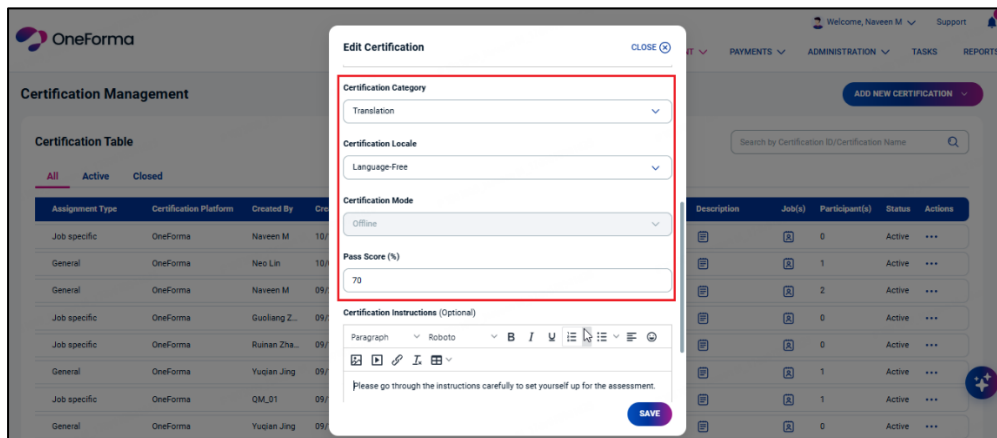

Offline

Select **offline** if the assessment is to be taken on campuses (paper test).

Applicants can take certification assessment from their campuses through physical test.

1. Select **Offline** from the drop-down.

This selection enables only these fields (**Certification Category, Locale, and Pass Score**).

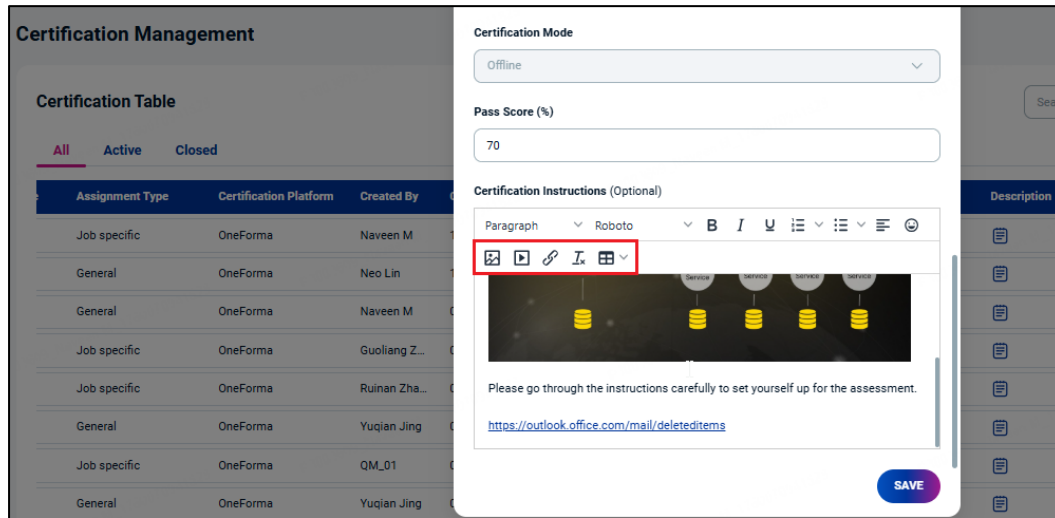

Note: You *cannot link* a question bank for offline certification assessment.

2. Enter the instructions for the applicants if required.

Note: You can insert images, videos, links, or tables, to the **Certification**

Instructions field.

- **Certification Minimum Taken Time (Minutes):** Minimum time required to complete the certification.
- **Certification Test Time Limit:** The maximum time allowed for an applicant to complete the certification.
- **Pass Score:** Score required to pass the certification.

- **No. of Questions Per Exam:** The number of questions from the Question Bank that you want to include in the certification.
Note: If the Question Bank contains 10 questions, you cannot enter a number greater than 10.

Certifications with these assessment modes will gauge applicants based on their expertise level.

- Native/Fluent: Greater than 90% right answers.
- Advanced: Between 80% and 90% of right answers.
- Intermediate: Between 70% and 80% of right answers.
- Basic/Novice: Less than 70% of right answers.

Enable Certification Retry

You can configure retry rules for applicants who do not achieve the passing score.

1. Enable the **Certification Retry** toggle to configure the retry score range.
Note: By default, the retry rules toggle is in the Disabled state. Once enabled, you must define a retry score range. If an applicant's score falls within this range — below the passing score but within the defined threshold — the applicant will automatically be granted a retry attempt.
2. Enter the range in **Score From%** and **Score To%** fields.

Note:

- When an applicant completes a certification and does not pass:
- Their remaining attempts are reduced by –1.
- If the applicant's score falls within the retry score range, an additional retry is granted,
- adding +1 to their remaining attempts.
- As a result, the applicant's remaining attempt count stays the same.
- Language Certification Assessment

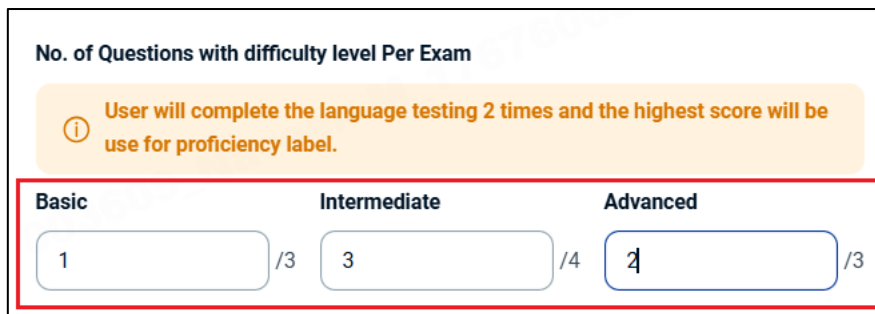

1. Select the relevant Question Bank to link it with the certification.

2. Upload the Certification Guideline document (only **PDF** files) if required.

Number of Questions per Certification

1. Enter the number of questions under each difficulty level.

Language Certification Assessment

This field appears only when you've selected **Language Testing** category and **Language Proficiency** scoring method. Applicants must attempt these language testing certifications twice and the highest score between the two attempts will determine their proficiency level.

This is based on the **Question Bank** linked with the certificate. For example, if the selected question bank has 10 questions with the following difficulty levels:

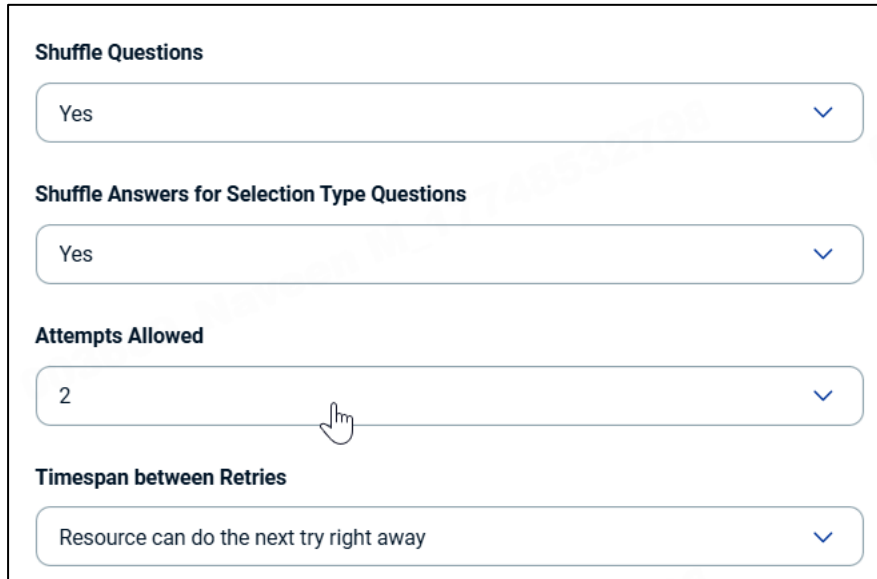

- Basic: 3
- Intermediate: 4
- Advanced: 3

Then, the application auto populates the total number of questions under each difficulty level.

Other Details

1. Select the following from the drop-down menu.

- **Shuffle Questions:** **Yes** or **No** to enable or disable shuffling of questions for the applicant.
- **Shuffle Answers for Selection Type Questions:** **Yes** or **No** to enable or disable shuffling of choices for single- and multi-select format questions.
- **Attempts Allowed:** Maximum number of attempts allowed for the applicant.
- **Timespan between Retries:** Accepted time delay between each attempt.

Shuffle Questions

Shuffle Answers for Selection Type Questions

Yes

Attempts Allowed

2

Timespan between Retries

Resource can do the next try right away

- **Assignment type:** Certification assignment type.
 - **Job specific:** Certifications specific to jobs, and are part of the job application process.
 - **General:** Certifications that are not specific to a particular job and are available for all OneForma resources.

Note: Marking the assignment type as **General** does not stop the QM team from linking these certifications to jobs or assigning them to resources.

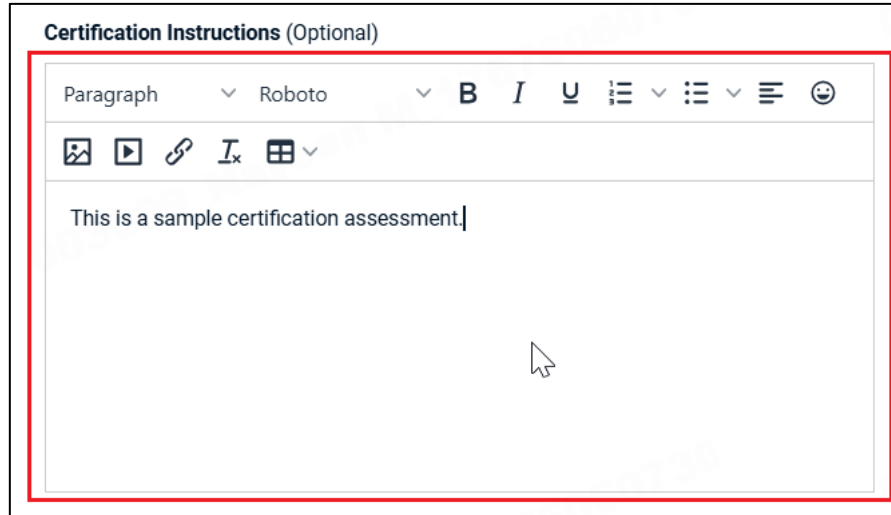

Assignment Type

Job specific

Job specific

General

2. Enter instructions relevant to the certification in the **Certification Instructions** field if required.

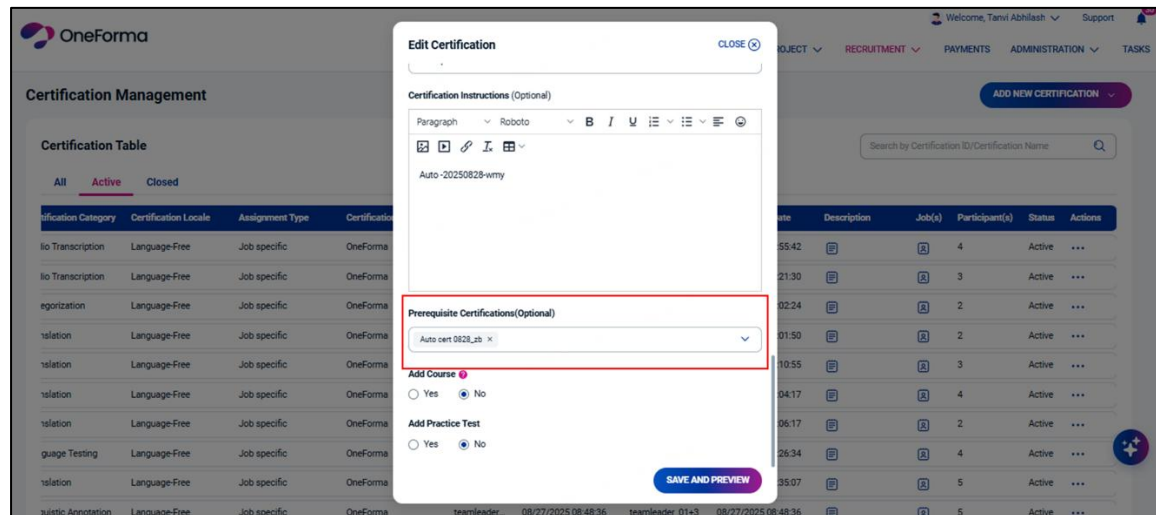

Add Prerequisite Certification

1. Select any number of prerequisite certification(s), if required, from the drop-down.

Note:

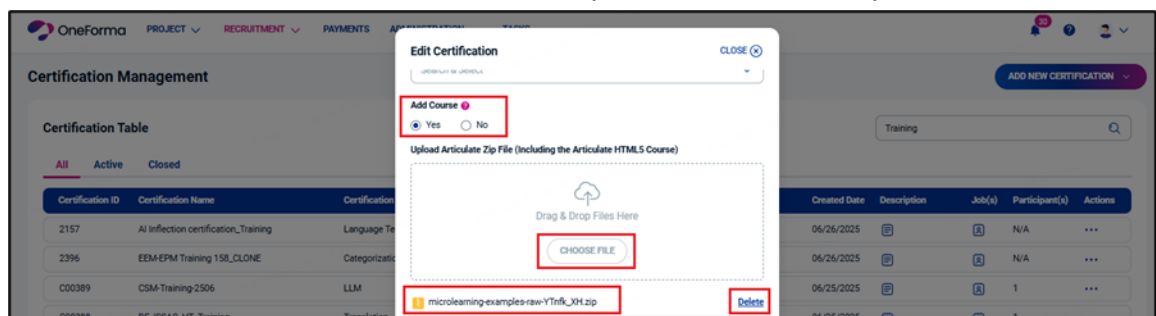

- You can edit an existing active or draft certification and add prerequisites if needed. However, pre-requisites cannot be added for the practice exam.
 - On the **Certification Management** page, navigate to the any tab.
 - Locate the relevant certification.
 - From the **Actions** column, click **Edit Certification**.
 - Scroll to the Prerequisite Certifications field and select the relevant pre- requisite certification to be added to your certification.
- The applicant must complete any prerequisite certification(s) before starting the original certification assessment, as the system enforces this order.
- Applicants who have already started the assessment are not required to complete the prerequisite certification, and their workflow remains unaffected.
- The added prerequisite is only visible to new applicants who have not yet begun the assessment.

Add Course

1. If a certification requires a training module/ course, select **Yes** or **No** to add a course in the **Add Course** section.
2. Click **Choose File** to upload an Articulate Zip file.

Note: You can click Delete to remove the uploaded articulate zip file.

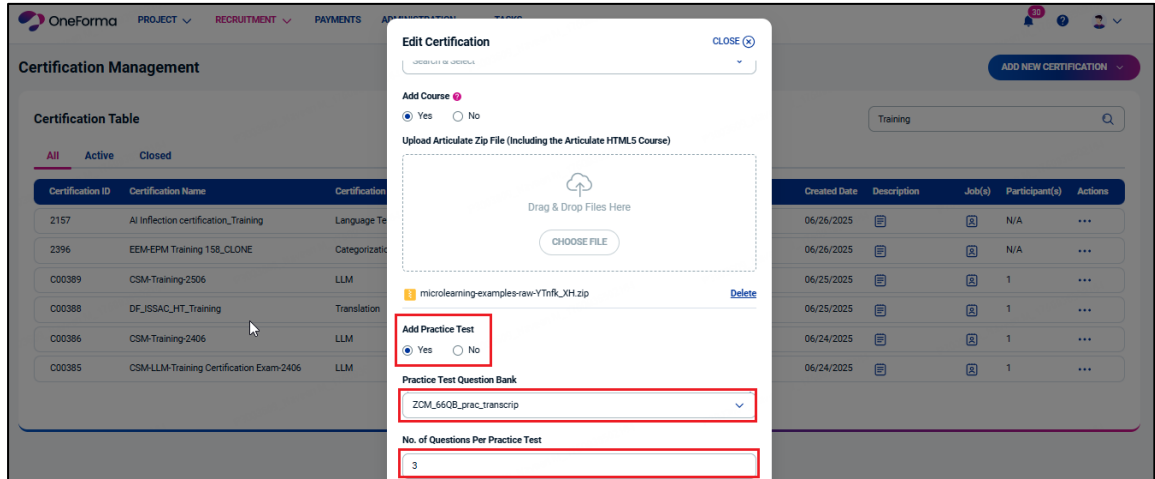

Add Practice Test

1. Select **Yes** or **No** to add a practice test in the **Add Practice Test** section.
2. If you select **Yes**, select the relevant practice question bank from the drop-down.
3. Enter the number of questions you want to include in your practice certification from the selected Question Bank.

Note: You can edit an existing active or draft certification and add practice test if needed.

- On the **Certification Management** page, navigate to the any tab.
- Locate the relevant certification.
- From the **Actions** column, click **Edit Certification**.
- Scroll to the Add Practice Test field and select a relevant Practice Question Bank.
- Enter the number of questions you want to include in your practice certification from the selected Question Bank.

Manage Certification

The options available under the Actions column depend on whether you are the creator of the certification or assigned as a certification manager. If you are neither, you can only view the certification and see participants.

Edit Certification

If you are the creator or Certification Manager, you can edit the Certification.

1. Locate the relevant Certification under **Certification Management**.
2. From the **Actions** column, click **ellipsis**.
3. Select **Certification**.
4. After editing, click **Save and Preview**.
5. Click **Yes** to confirm.
6. The Certification preview opens in a separate tab, click **Next** to review all the configurations.

7. Click **Close This Tab** to exit.

Clone Certification

As a recruiter or L&D personnel, you can clone any active certification available in OneForma. The cloned certification will be named in the following manner: **original certification name_1**.

Cloning a certification will copy the entire configuration of the certification along with all the added certification managers. You can edit the cloned certification configurations and add new certification managers if required.

1. After you reach the Certification tracking table, navigate to the **Active** tab.

See Participants

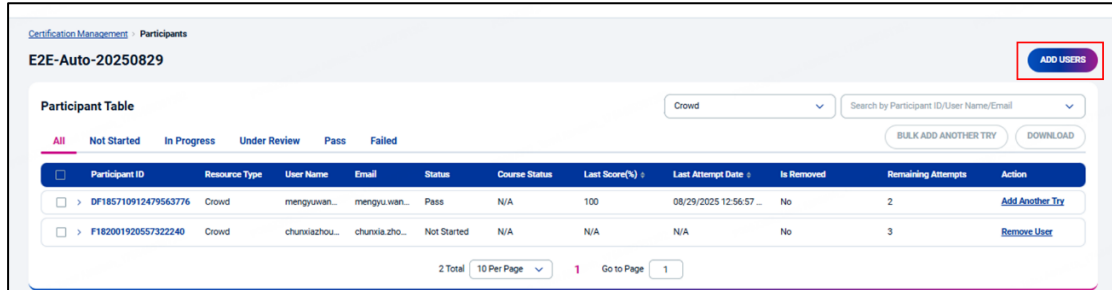

With **See Participants**, you can perform the following actions.

- View the assigned applicants' status for a certification and add or remove applicants from a certification.

Add User(s)

You can directly assign resources to a certification. When assigned this way, the certification is independent and will not be tied to the job application workflow.

1. From the **Participant Table**, after clicking **See Participants** and click **Add User**.

The screenshot shows the 'Participant Table' for certification 'E2E-Auto-20250829'. The table has columns for Participant ID, Resource Type, User Name, Email, Status, Course Status, Last Score(%), Last Attempt Date, Is Removed, Remaining Attempts, and Action. Two participants are listed. The first participant (DF185710912479563776) is a 'Crowd' user who has 'Pass'ed. The second participant (F182001920557322240) is a 'Crowd' user who has 'Not Started'. The 'ADD USERS' button is highlighted in the top right corner.

Participant ID	Resource Type	User Name	Email	Status	Course Status	Last Score(%)	Last Attempt Date	Is Removed	Remaining Attempts	Action
DF185710912479563776	Crowd	mengyu.wan...	mengyu.wan...	Pass	N/A	100	08/29/2025 12:56:57 ...	No	2	Add Another Try
F182001920557322240	Crowd	chunxia.zho...	chunxia.zho...	Not Started	N/A	N/A	N/A	No	3	Remove User

2. You can assign the certification to any resource type (Crowd, Professional, Agency, and Employee) user.
3. Search for the required users by Participant ID, Username or Email.
4. Select the checkboxes of the resources.
5. Click **Add User**.

Note: You cannot assign resources that were already assigned to the certification.

- Mention the reason for the removing the applicant and click **Confirm**.

Note: If you remove an applicant from a certification that is linked to a job application, the applicant will also be automatically rejected from the associated job.

Add Another Try

After an applicant has exhausted their certification attempts, you can allow them to take up the certification assessment by adding additional attempts. You can add additional attempts for applicants in **Failed**, **Passed**, **Under Review** and **In Progress** status.

- After clicking **See Participants**, in the **Participant Table**.
- Navigate to the **Failed** Tab and locate the relevant participant.

- From the **Actions** column, click **Add Another Try**.

Note: You can also use the **Bulk Add Another Try** feature to provide additional attempts to multiple applicants at once.

- Select the relevant users from the participant table.
- Click **Bulk Add Another Try**.

View Result

You can view the certification details, including the applicant's responses and their final score.

1. After clicking **See Participants**, in Participant Table locate the relevant applicant and expand it to see the following details.
 - **Certification Platform:** Hosting platform of the certification
 - **Certification Category:** Category in line with the job
 - **Attempts Allowed:** Maximum number of attempts allowed
 - **Attempts Order:** Number of attempts consumed by the applicant
 - **Time Allowed:** Maximum time allowed to complete the certification
 - **Applicant Time:** Date of when the assessment was taken by the applicant
 - **Pass Score:** Minimum percentage to pass the certification
 - **Course Status:** Completed/In Progress
 - **Status:** Pass/Failed
 - **Applicant Score:** Percentage obtained by the applicant
 - **Language Proficiency:** Only for language assessment certifications.
2. Under the **Action** column, click **View Result**.

5 Total 10 Per Page 1 Go to Page 1

3. The Certification Exam Result opens in a separate tab, where you can click **Start Review** to begin.
4. Review all applicant responses along with the correct answers, click **Next** to move through the certification results.
5. Review the final result page and click **Close This Tab** once you have finished the review.

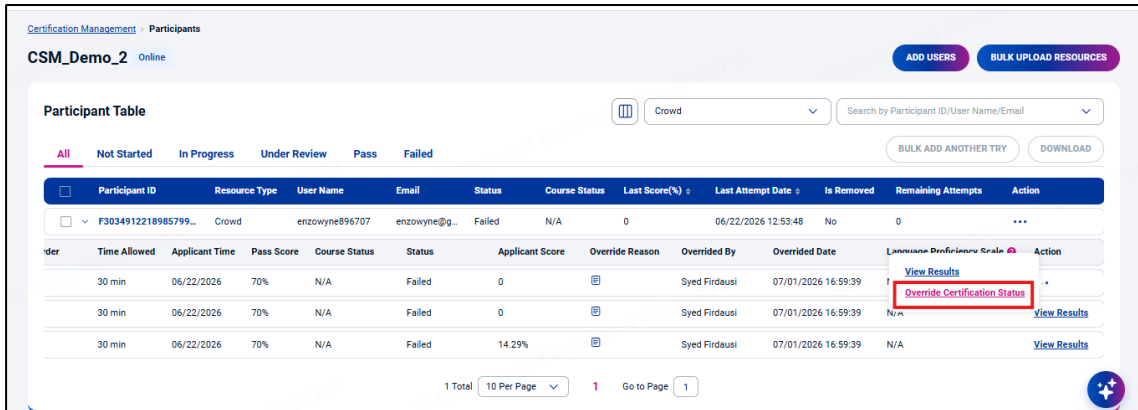

Override Certification Status

You can override an applicant's certification status from Fail to Pass or Pass to Fail.

Override from Fail to Pass

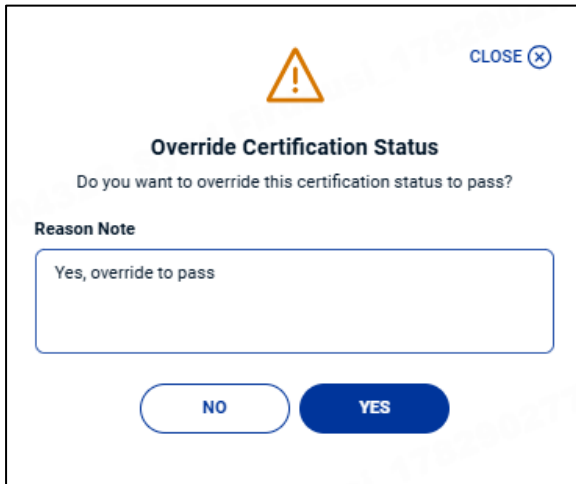

If an applicant fails the certification but you still want to allow them to continue with the job application, you can use the **Override Certification Status**.

1. After clicking **See Participants**, in the **Participant Table**, locate the applicant and expand to see their certification details.
2. Under the **Action** column, click **Override Certification Status**.

The screenshot shows the 'Participant Table' interface. At the top, there are tabs for 'All', 'Not Started', 'In Progress', 'Under Review', 'Pass', and 'Failed'. The 'Failed' tab is selected. Below the tabs is a table with columns: Participant ID, Resource Type, User Name, Email, Status, Course Status, Last Score(%), Last Attempt Date, Is Removed, Remaining Attempts, and Action. A participant with ID 'F3034912218985799...' is highlighted. The 'Action' column for this participant shows a dropdown menu with the option 'Override Certification Status' highlighted in red.

3. Enter a reason for the action.

The dialog box is titled 'Override Certification Status' and contains a warning icon. It asks 'Do you want to override this certification status to pass?'. Below the question is a 'Reason Note' field with the text 'Yes, override to pass'. At the bottom, there are two buttons: 'NO' and 'YES'.

4. Click **Yes** to confirm.

After the override, the Participant table will display the updated certification status along with the reason for the override.

Note:

- You can only override the results of the applicant's latest attempt.
- The published pass score is the minimum score required to pass the certification, as defined in the certification settings. However, if you click View Result for the modified attempt, it will still show the original result.
- The applicant will be notified, and they can continue their job application.

Note: To remove a Certification Manager, click **Remove** from the Certification Manager table. A Certification Manager cannot remove the certification owner.

4. Search by Employee ID, Employee Name, or Email.
5. Select the checkbox next to the employee ID.
6. Click **Add Manager**.

7. Click **Yes** to confirm.

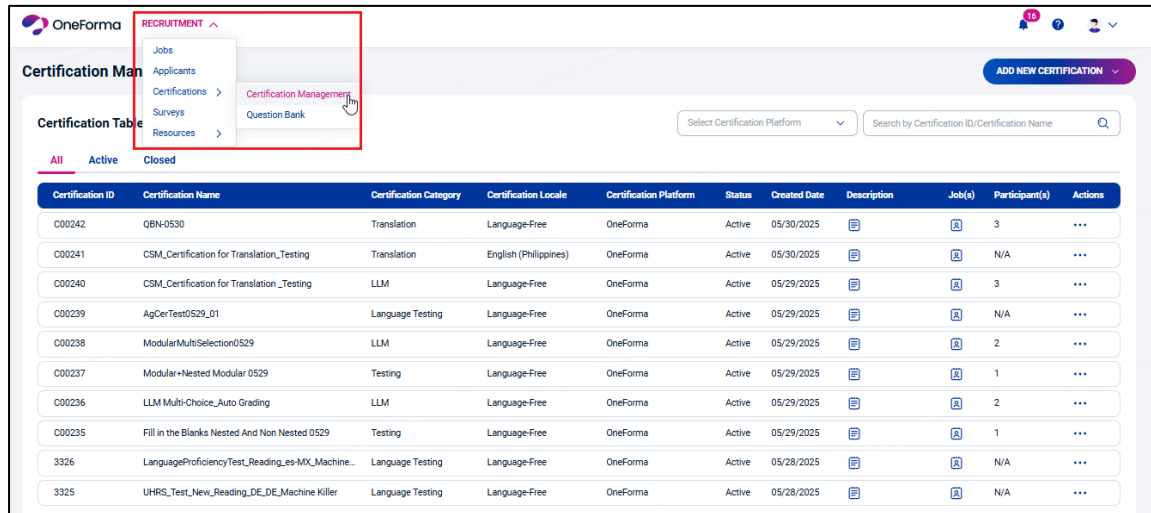

Manual Grading of Certifications

You can add SME resources to manually evaluate the certification. At this stage, different roles such as QM, PM, recruiters, and SMEs are involved in the certification manual grading workflow.

Manage SME Grader

As a recruitment manager or lead, you can add SMEs to the SME Group from available resources (Crowd, Professionals, Agency Workers, and Employees) to evaluate certifications.

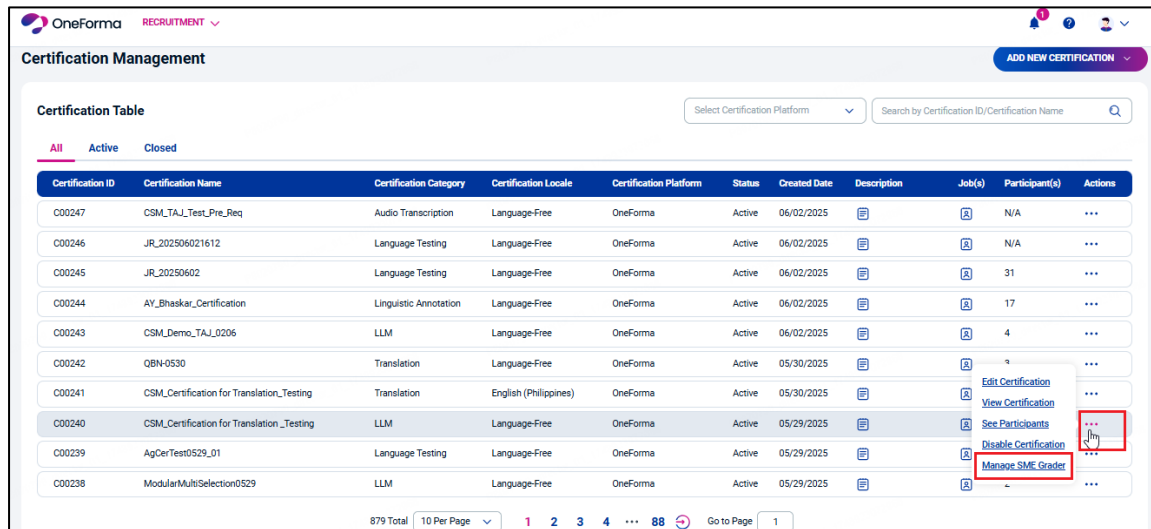

1. Navigate to the **Recruitment** module.
2. Select **Certifications** and click **Certification Management**.

The screenshot shows the OneForma Recruitment dashboard. A red box highlights the 'RECRUITMENT' menu, which includes 'Jobs', 'Applicants', 'Certifications', 'Surveys', and 'Resources'. The 'Certifications' option is selected, leading to the 'Certification Management' page. This page features a 'Certification Table' with tabs for 'All', 'Active', and 'Closed'. The table lists various certifications with columns for ID, Name, Category, Locale, Platform, Status, Created Date, Description, Job(s), Participant(s), and Actions. A search bar and a dropdown for 'Select Certification Platform' are also visible.

Certification ID	Certification Name	Certification Category	Certification Locale	Certification Platform	Status	Created Date	Description	Job(s)	Participant(s)	Actions

6. Click **Add User**.
- Note:** You can also add SME graders by searching for SMEs using **Contractor ID**, **Username**, or **Email**.

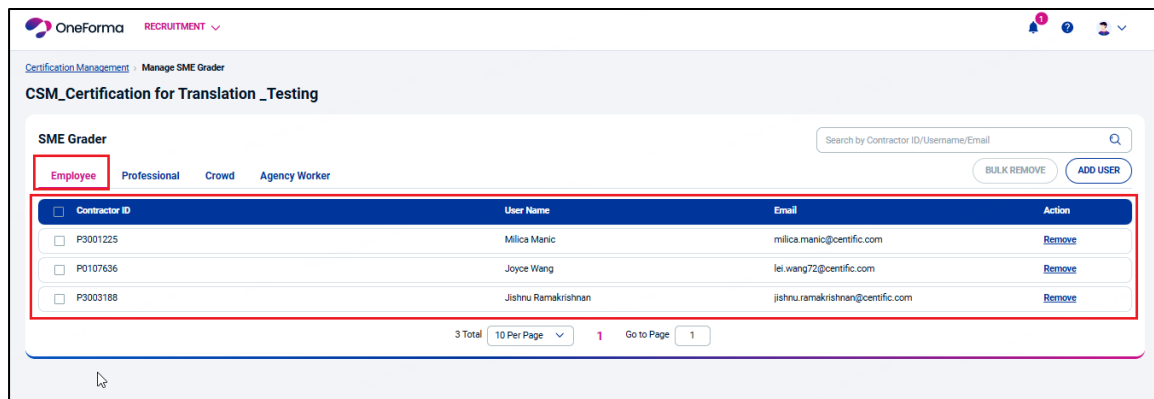

7. Select resources from the relevant tab by selecting the checkbox next to their respective Contractor ID (employee, professional, crowd, agency worker).

8. Click **Add Users**.
9. Click **Yes**.

The resource(s) gets added to the group and is reflected on the **SME Grader** page.

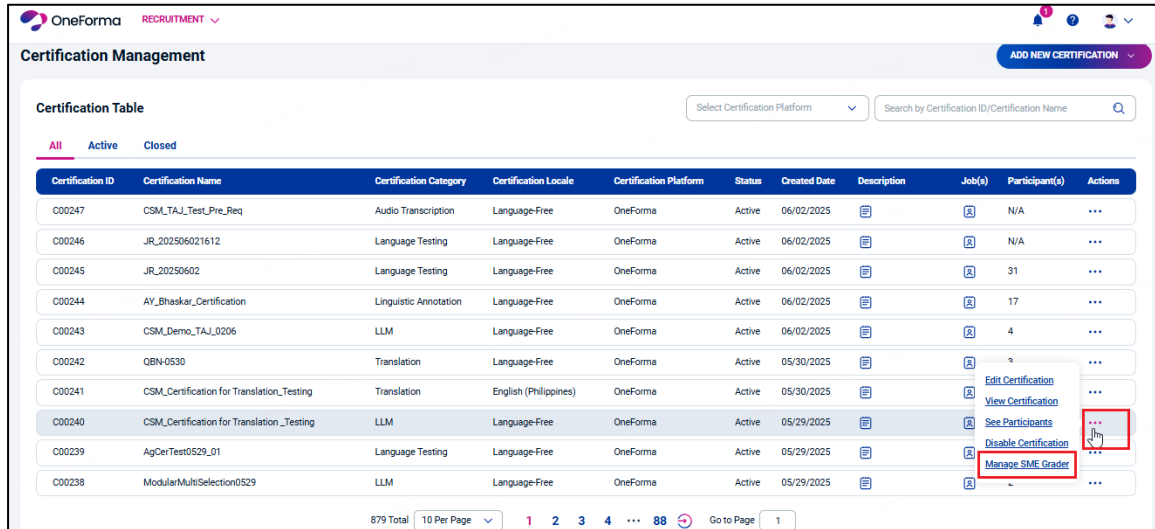

Note: These SME Groups are relevant for the PM/QM when assigning SME to grade certification(s).

Remove Resources from SME Grading

You can also remove resources from the SME Graders group.

1. Locate the specific certification.
2. From the **Actions** column, click the **Ellipsis** menu.
3. Click **Manage SME Grader**.

7. Select the relevant **SME Grader**.

8. Click **Confirm**.

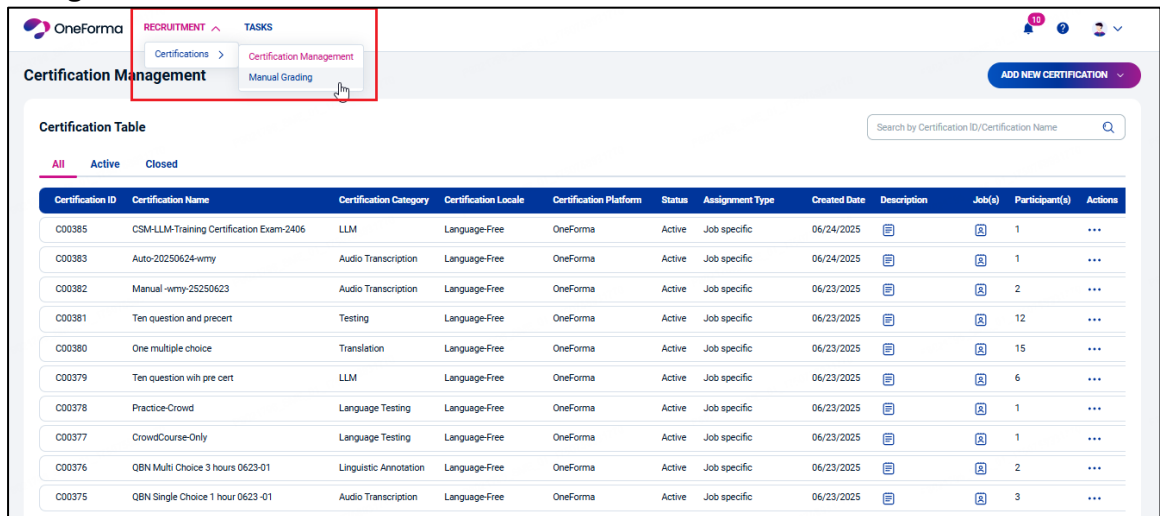

The SME resources move to the **Assigned** section in the **Assignment Table**.

SME Perform Manual Grading Task

As a Subject Matter Expert (SME), you can manually grade an applicant's certification assessment.

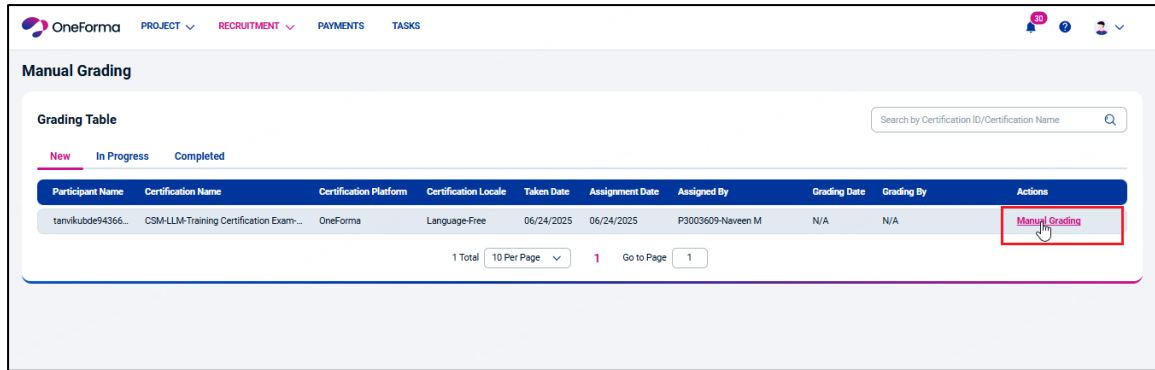

1. Navigate to the **Recruitment** module.

2. Select **Certifications** and click **Manual Grading**. You will see the following lists

- **New:** New assignment tasks assigned by the PM.
- **In Progress:** Assignment tasks that are in progress.

- **Completed:** Assignment tasks that were completed.

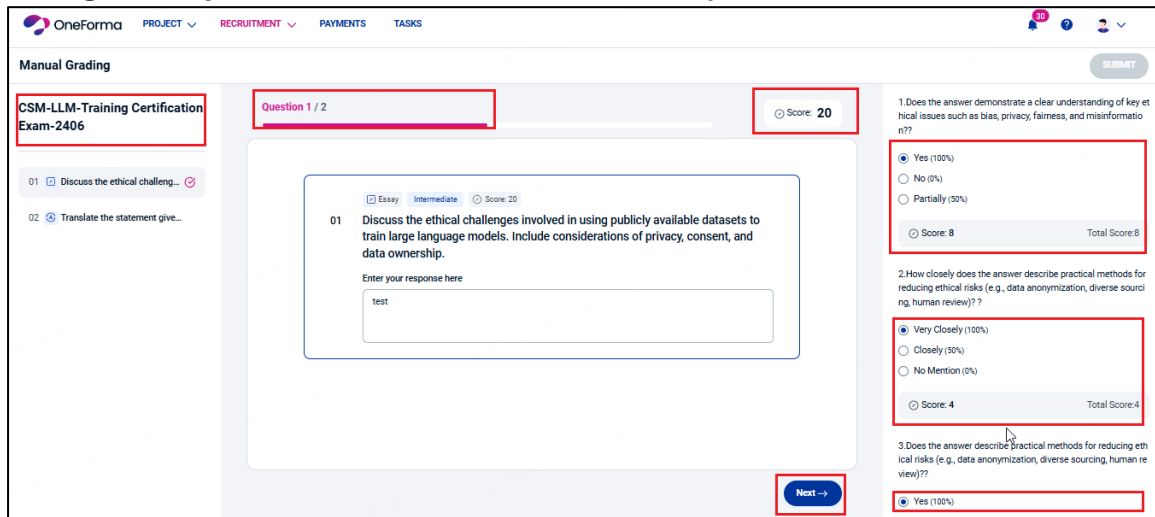

The screenshot shows the 'Manual Grading' section of the OneForma interface. At the top, there are tabs for 'New', 'In Progress', and 'Completed'. Below these is a 'Grading Table' with a search bar. The table has columns for Participant Name, Certification Name, Certification Platform, Certification Locale, Taken Date, Assignment Date, Assigned By, Grading Date, Grading By, and Actions. A row is highlighted with a red box around the 'Manual Grading' link in the Actions column.

Participant Name	Certification Name	Certification Platform	Certification Locale	Taken Date	Assignment Date	Assigned By	Grading Date	Grading By	Actions
tanvikubde94366...	CSM-LLM-Training Certification Exam...	OneForma	Language-Free	06/24/2025	06/24/2025	P3003609-Naveen M	N/A	N/A	Manual Grading

3. From the **Actions** column, click **Manual Grading**.

The SME evaluation page appears with the following components.

- **Left Component:** Shows the certification name.
- **Center Component:** Contains the answers entered by the applicant.
- **Right Component:** Contains the section where you can evaluate.

The screenshot shows the 'Manual Grading' page for a specific assignment. The left sidebar displays the certification name 'CSM-LLM-Training Certification Exam-2406' and a list of questions. The center area shows 'Question 1 / 2' with a score of 20. The question text is: '01 Discuss the ethical challenges involved in using publicly available datasets to train large language models. Include considerations of privacy, consent, and data ownership.' Below the question is a text input field with the word 'test' entered. The right sidebar contains three evaluation questions with radio button options and scores. A 'Next ->' button is at the bottom right.

Question 1 / 2 Score: 20

01 Discuss the ethical challenges involved in using publicly available datasets to train large language models. Include considerations of privacy, consent, and data ownership.

Enter your response here

test

1. Does the answer demonstrate a clear understanding of key ethical issues such as bias, privacy, fairness, and misinformation?

☒ Yes (100%)
☐ No (0%)
☐ Partially (50%)

Score: 8 Total Score: 8

2. How closely does the answer describe practical methods for reducing ethical risks (e.g., data anonymization, diverse sourcing, human review)?

☒ Very Closely (100%)
☐ Closely (50%)
☐ No Mention (0%)

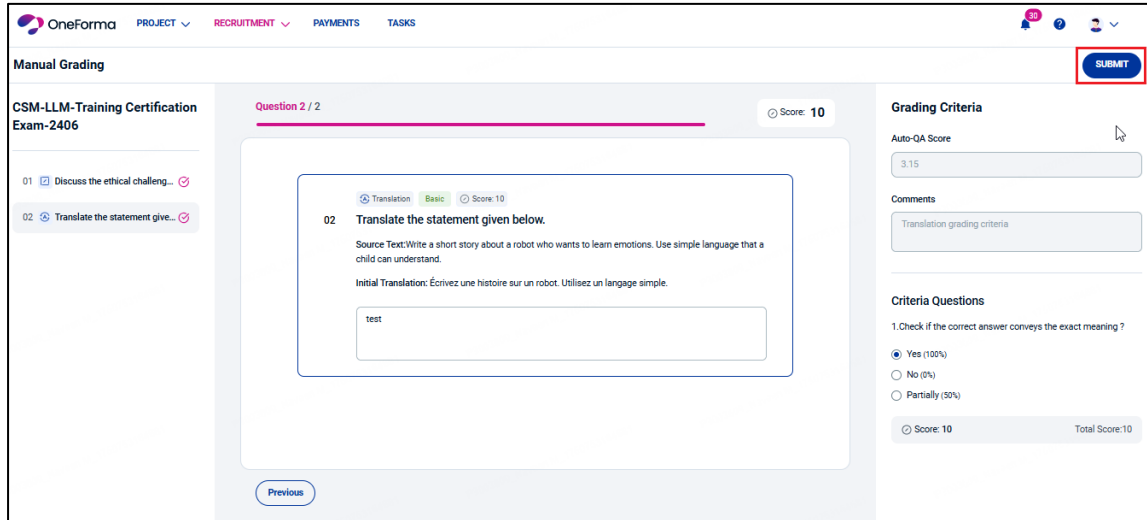

Score: 4 Total Score: 4

3. Does the answer describe practical methods for reducing ethical risks (e.g., data anonymization, diverse sourcing, human review)?

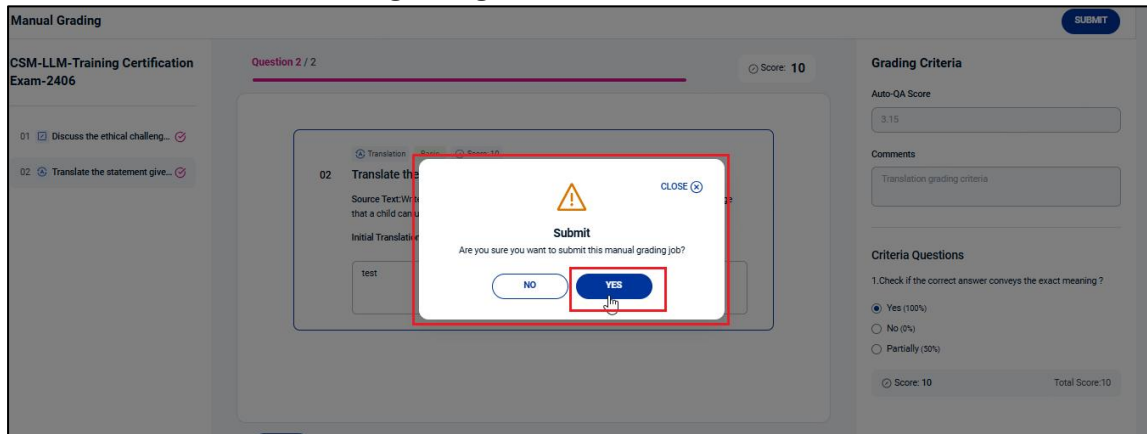

☒ Yes (100%)

[Next ->](#)

4. Grade every response by select the relevant options based on the question and the grading criteria configurations. Click **Next** until you reach the last question.
Note: In the left section, you can view the Auto QA score and comments (if configured, read-only). You will also see the grading criteria with options to score the applicant's response.
5. Click **Submit**.

6. Click **Yes** to submit manual grading task.

Track Certification Status

After an applicant has applied for a posted job, they are required to complete the certifications associated with the job.

The **In-Certification** tab displays all the applicants who have begun the certification.

Note: The **In Certification** tab is only visible for professionals and crowd users, who can be part of certifications.

- View certification exam results
- Monitor pass/fail status
- Check assessment scores

Override to Endorse Applicant

You can endorse an applicant crowd even if they have failed the certification assessments or were initially rejected, but later you decide to endorse them.

1. Navigate to the Recruitment module.
2. Select **Recruitment** and select **Applicants**.
3. Select the relevant job from the **Search by Job** drop-down.
4. In the Applicant Tracking table, navigate to the **All** tab.
5. Click **Contractor ID** to expand applicant particulars.

Contractor ID	User Name	Email	Resource Type	Role	Country	Native Language	Fraud Risk	Status	User Status	3rd Platform Account Status	Actions
F153401043630063616	tanvikubde94236643	tanvikubde9@gmail.com	Crowd	Annotator	India	Albanian (Kosovo)	84	Rejected	Active	UHRS - Failed	Override to Endorse

6. From the **Actions** column, click **Override to Endorse**.

Certification Watermarking

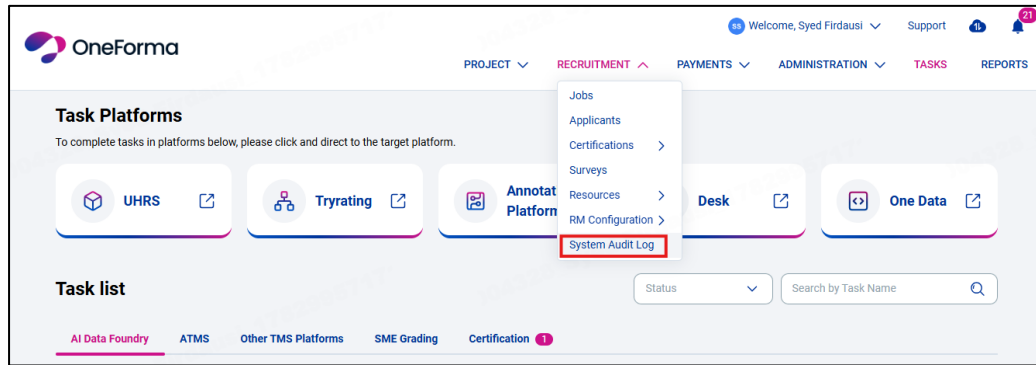

With the in-house certification creation platform, you can ensure that the certification is secured from all malpractices with:

- No copy/paste option available both to the internal and external users.
- Watermarking enabled for the captured images (of certification assessment) that are shared online.

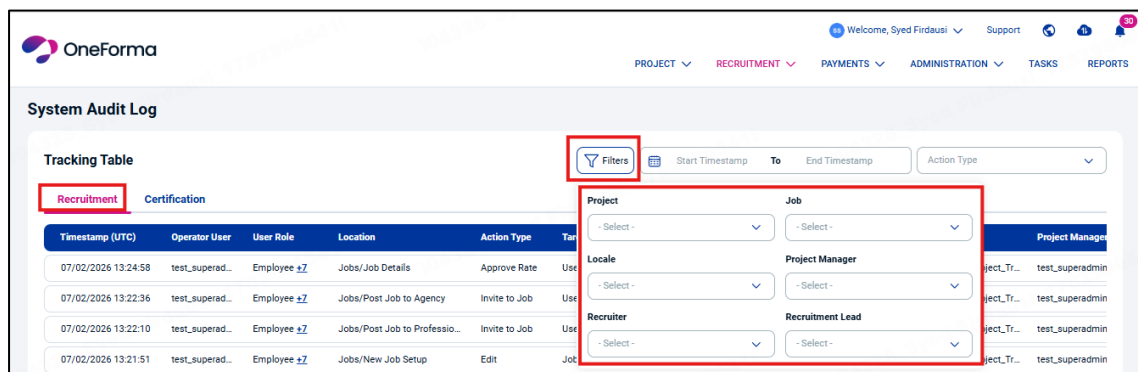

View System Audit Log

The System Audit Log records all actions performed across the recruitment and certification modules, allowing you to track and verify user activity. Logs are available only from the date of feature release — historical actions from previous versions are not included. The audit log is view-only; editing, downloading, or any other action on the log is not supported.

1. From Recruitment, select **System Audit Log**.

2. The System Audit Log screen opens with two tabs: **Recruitment** and **Certification**.
Note: The Recruitment tab is open by default when the page loads.
3. Click the **Recruitment** tab.
 - Click the **Filter** icon to open the filter menu. The following filters are available as dropdowns:
 - Project
 - Job
 - Locale
 - Project Manager
 - Recruiter
 - Recruitment Level
 - Action Type
 - Use the **Start Timestamp** and **End Timestamp** fields to filter records by a specific period of time.
4. Use the **Action Type** filter to narrow results by specific actions such as edit, assign, reassign, and others.

The recruitment audit log displays a summary of all actions performed in the recruitment module — including jobs, applicants, survey, production, and configuration. For each record, the log captures details such as the timestamp, the user who performed the action, location, action type, change details, the associated project and job, and the recruiter and recruiter lead involved.
