Creating a Survey in OneForma

Overview

This guide provides step-by-step instructions for creating, managing, and monitoring survey questionnaires in OneForma. You will learn how to set up new surveys, integrate them with third-party platform, manage participant responses, and assign surveys to resources in bulk.

Create New Survey

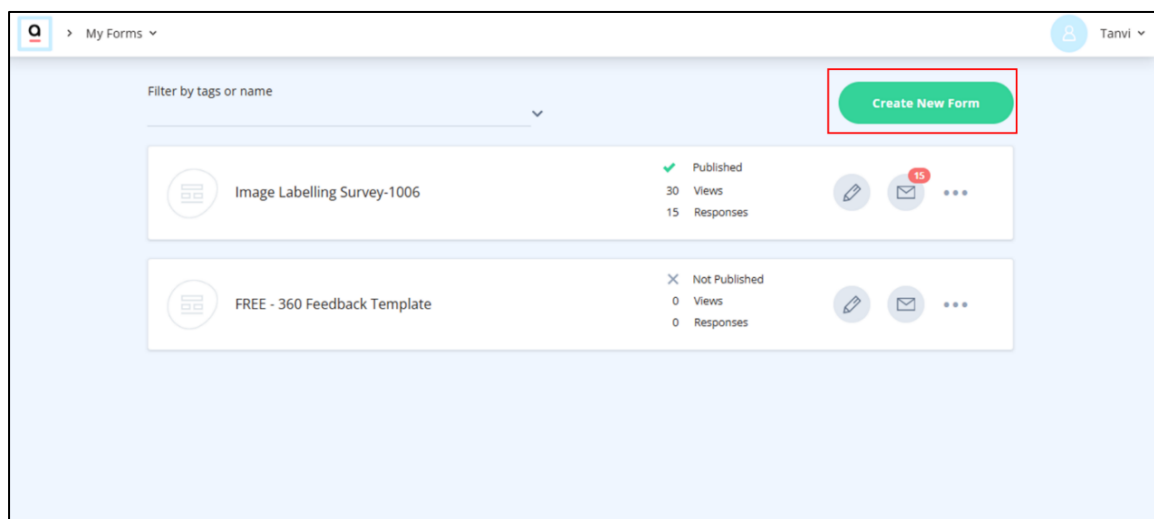

Prerequisites

Before creating surveys, ensure you meet the following requirements:

- Appropriate permissions to create and manage surveys in OneForma.
- Access to AidaForm for questionnaire creation and integration.

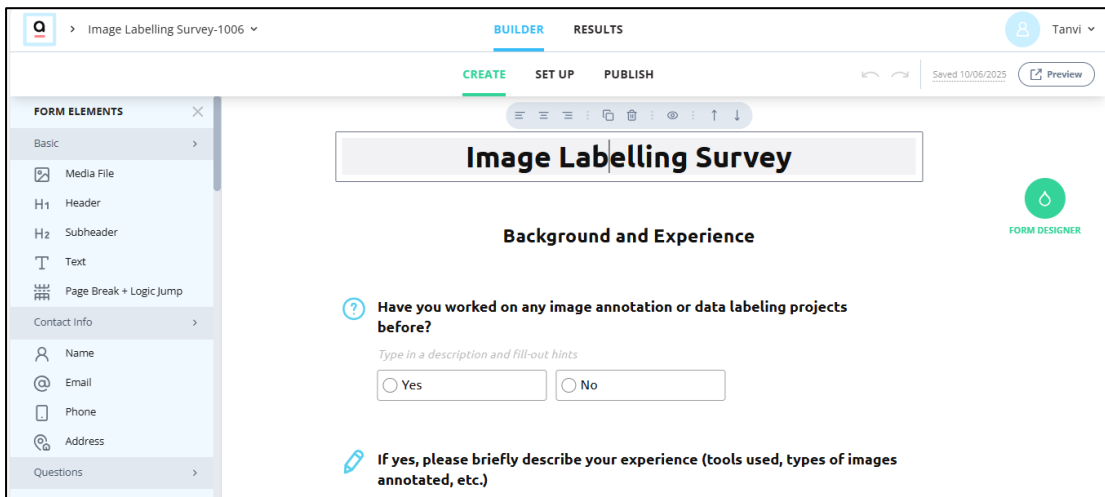

Configure a Survey on AidaForm

1. Log In to **AidaForm** - <https://my.aidaform.com/>
2. Click **Create New Form**.

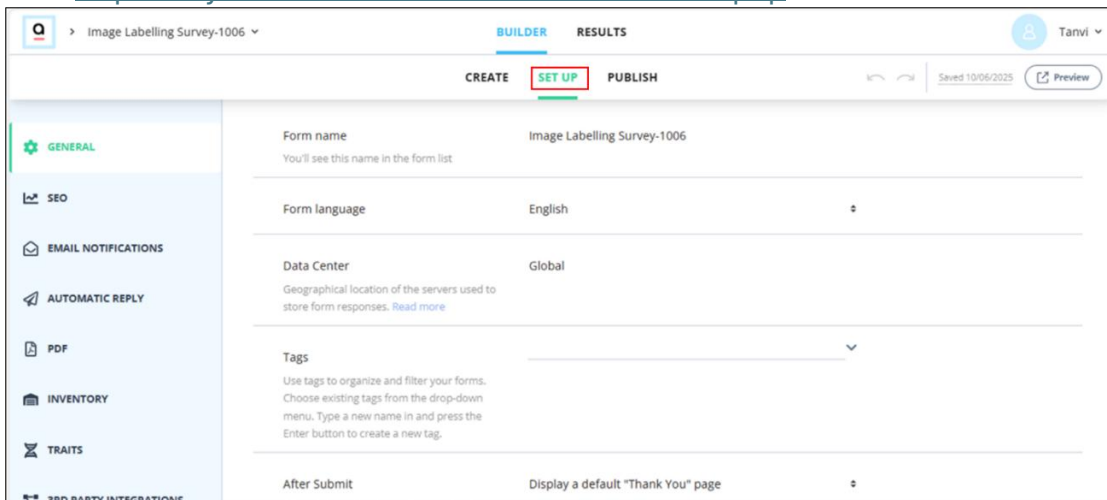

3. Select **Create Blank Form** to start with a clean page and customize it yourself or choose **To Template Gallery** to use a pre-made template.
 - If you select **Template Gallery**, a list of pre-made templates will be displayed. Choose the required template and configure it as needed.
 - If you select **Create Blank Form**, you will be prompted to provide a name for the form before proceeding.
4. Drag and drop form elements from the left-hand panel to the center workspace, and configure each element as required.
 - Add a Media File for images.

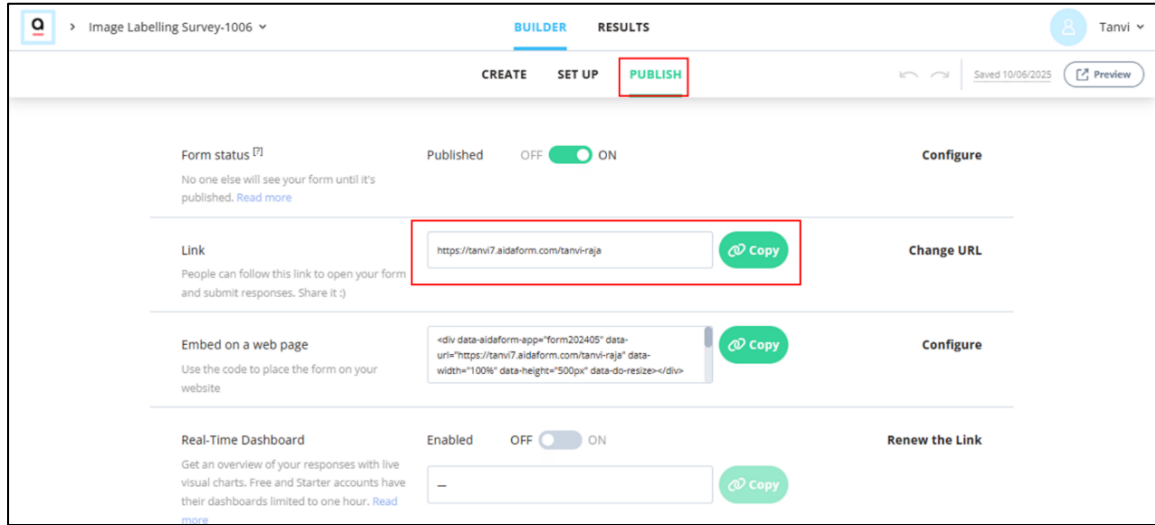

- Include Header and sub-header with introduction.
 - Insert questions (multiple choice, short text, long text, dropdown).
 - Configure each question using the green gear icon to set:
 - Mandatory status
 - Multiple selection options
 - Descriptions or examples
5. Optionally add these hidden fields at the end of your survey using exact query parameters:
- OneForma: Captures Username
 - email: Captures Email address
 - language1: Captures Native language 1
 - language2: Captures Native language 2
 - country: Captures Country
 - In the hidden file section, add job_id and user_id.

6. Click Set Up to apply additional settings.
- Select **3rd Party Integration** then click **Webhooks**.
 - Add: <https://my.oneforma.com/webhooks/aidaform.php>

- Click **Publish** and toggle the Published status to **On**.
- Click **Copy** to copy the link to the created survey form. Customize the URL path by clicking **Change URL** (if required) and retain the default values for all other settings.

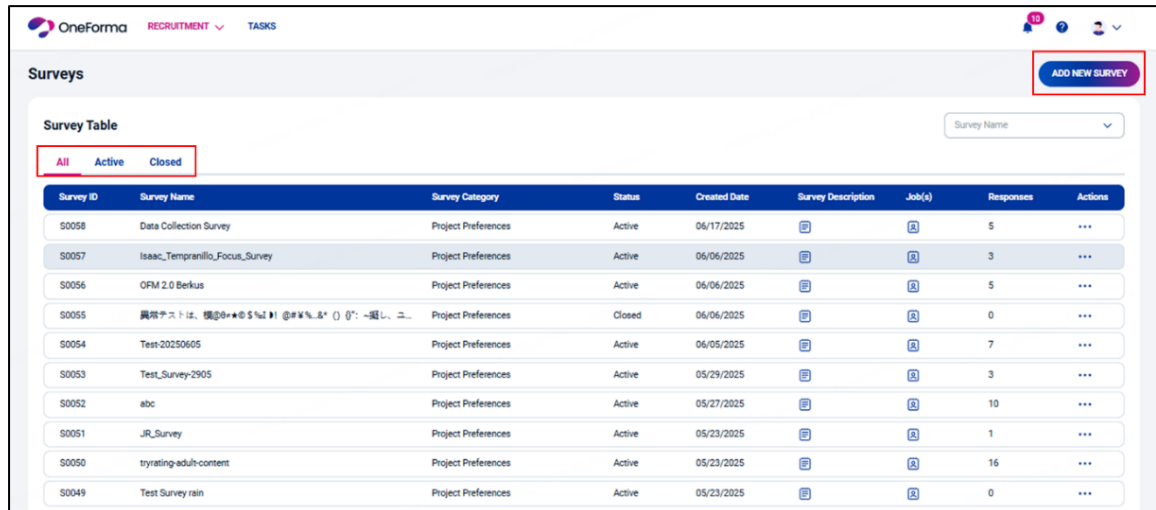

Best Practices

- Verify all hidden fields that are configured correctly.
- Test the complete survey flow before publishing.
- Regularly export and backup survey data.
- Maintain GDPR compliance by restricting access to authorized personnel.
- Report technical issues to the Solutions team via the Solutions tracker.

Create a Survey in OneForma

Surveys in OneForma may be part of the job application workflow, and are of two types:

- **Regular Surveys:** Used to understand a resource's skills or work preferences. After completing the survey, resources can continue with the job application process.
 - **Qualifier Surveys:** These surveys include predefined acceptable answers, making them a qualifying step in the job application process.
 - If a resource's responses match the acceptable criteria, they can proceed to the next step.
 - If the responses do not match, the resource gets disqualified and cannot continue with the job application process.
- Navigate to **Recruitment** module in the top navigation menu.
The survey list has three different tabs:
 - **All:** Complete list of all surveys.
 - **Active:** Currently active surveys.
 - **Closed:** Deactivated or completed surveys.
 - Click **Add New Survey** in the upper right corner.

Add Selection Criteria for Surveys

If the survey is a qualifier survey, you must add selection criteria during the survey set up. Based on the criteria, the application will automatically filter out resources that do not meet the configured survey requirements.

1. Click **Add Selection Criteria**.
2. Select the **Survey Number** from the drop-down.
Note: Survey Number corresponds to the survey question number within AIDA form.
3. Select the **Survey Type** from the drop-down.
 - **Single Choice:** When you select this option, you must enter the answer in the **Survey Answer** field. This makes the question a qualifying criterion for applicants.
 - **Multiple Choice:** When you select this option, you must enter all the right answers in the **Survey Answer** fields.

- Enter the **Survey Answer** into the field.

+ ADD SELECTION CRITERIA

SAVE

- Click **Save**.
The survey will be available in the **Active** tab.

Manage Surveys

Modify Survey Information

- In the Active list, find the survey you want to edit.
- Click the **Action** button next to it.
- Select **Edit Survey** to update/modify.
- Click **Save**.

Deactivate a Survey

- Click the **Action** button next to the survey.
- Select **Disable Survey**.
- Click **Yes**.

Note: Disabling the survey will move it to the **Closed** list. Surveys currently linked to active projects cannot be disabled.

Enable a Survey

1. Go to the **Closed** list and click the **Action** button next to the survey.
2. Select the **Enable Survey** option.
3. Click **Yes**.

Monitor Survey Participants

View Participant Details

1. Click the **Action** button next to the survey.
2. Click the **See Participants** option for your chosen survey.

Access Survey Responses

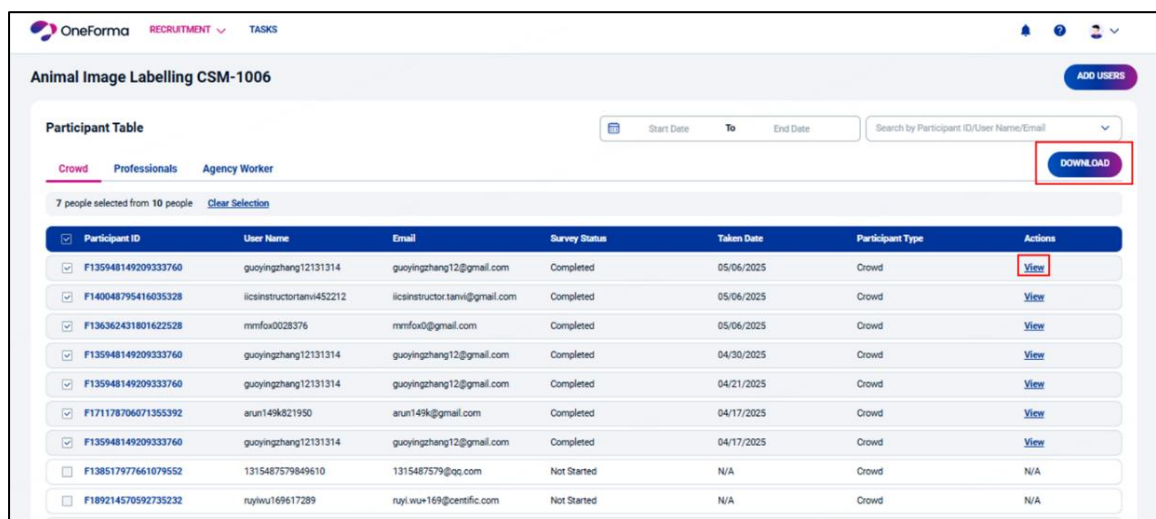

1. Click the **Action** button next to the survey.
2. Click the **See Participants** for the chosen survey.
3. Locate the participant in the list.
4. Click the **View** button next to participant's entry to see their survey responses.

Export Survey Data

1. Select the checkboxes for the participants whose data you want to export.
2. Click **Download** in the survey interface to export detailed survey results.

Best Practices

- Verify all survey information before saving.
- Test the questionnaire link before implementation.
- Regularly monitor participant responses.
- Export data periodically for backup and analysis purposes.

Assign Survey to Participant(s)

You can assign surveys to any resource type (**crowd, professional, or agency owners**), even outside the scope of job application. However, in Agency Owners' case, they will then add Agency Workers to the selected survey.

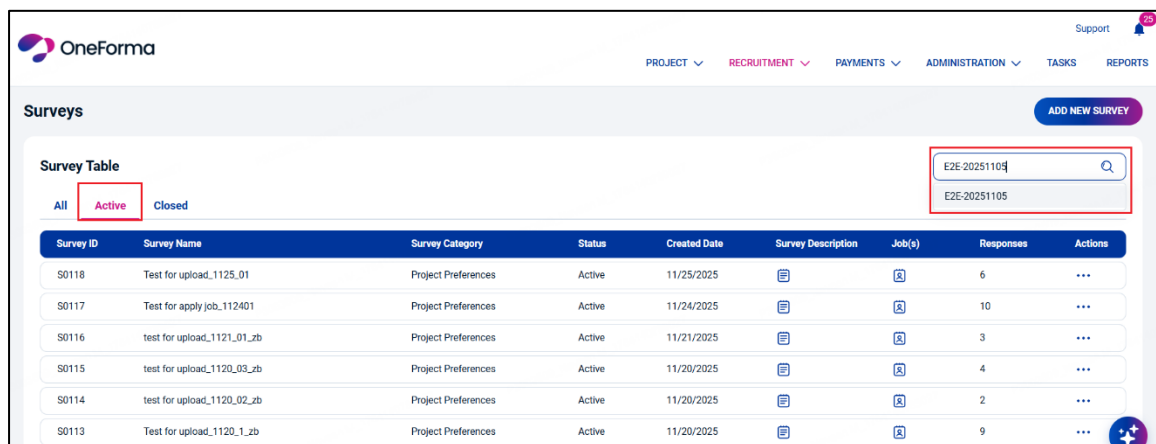

1. Navigate to the **Recruitment** menu and select **Surveys** to view the **Survey Table**.

The screenshot shows the OneForma dashboard. The top navigation bar includes PROJECT, RECRUITMENT, PAYMENTS, and ADMINISTRATION. The RECRUITMENT menu is expanded, showing options: Jobs, Applicants, Certifications, Surveys, and Resources. The Surveys option is highlighted with a red box. Below the navigation bar, the dashboard displays various metrics and project lists.

2. Navigate to the **Active** tab.
3. Locate the relevant survey from **Survey Table**.

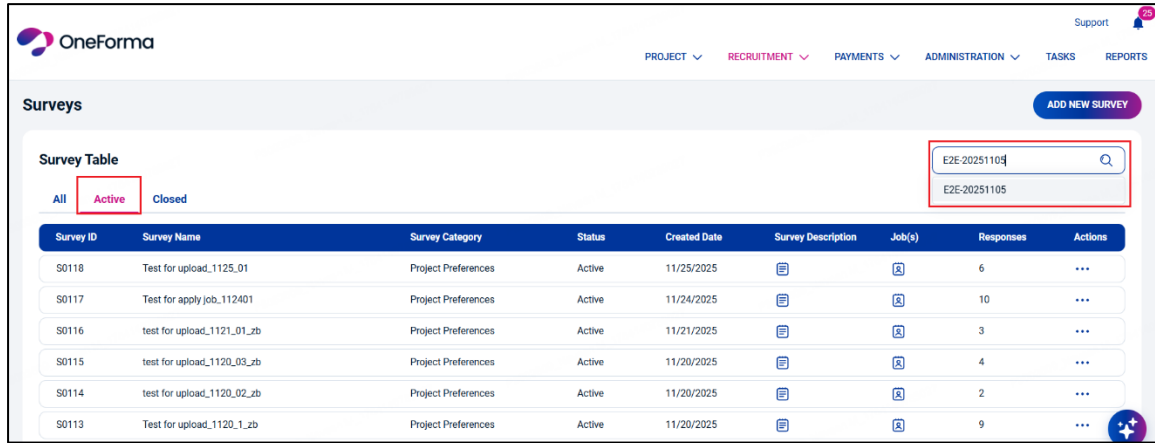

Note: You can also search for the relevant survey using its name in the **Search** box.

The screenshot shows the OneForma Surveys page. The top navigation bar includes PROJECT, RECRUITMENT, PAYMENTS, ADMINISTRATION, TASKS, and REPORTS. The Surveys section is active, showing a search box with the text "E2E-20251105" and a red box around it. Below the search box, the Survey Table is displayed with columns: Survey ID, Survey Name, Survey Category, Status, Created Date, Survey Description, Job(s), Responses, and Actions. The Active tab is selected, and the table lists several surveys.

Survey ID	Survey Name	Survey Category	Status	Created Date	Survey Description	Job(s)	Responses	Actions
S0118	Test for upload_1125_01	Project Preferences	Active	11/25/2025		A	6	...

Monitor Survey Results

You can monitor the results from completed surveys.

Access Results

1. Log in to **AidaForm**.
2. Select your survey.
3. Navigate to **Result**, then select **Result Inbox**.
4. Download results:
 - Select all responses.
 - Click the download button.
 - Results will be sent to your email.

Set-up Email Notifications

1. Navigate to **Builder** then select **Set Up**.
2. Select **Email Notification** from the left panel and add your email address.
3. For Notifications, toggle **enabled** to **ON**.
4. Configure rest of the notification preferences for new responses if required.

Important Notes

- The access of AidaForm is restricted to recruiters due to GDPR requirements.
- Share exported response data with Project Managers rather than direct system access.
- Regular monitoring of responses is recommended to maintain data quality.
