Endorsement Configuration Rule

Overview

Recruitment team leaders can create and manage configuration rules to automatically endorse resources. This is applicable only to **crowd/expert talent** resources in their **Under Review** stage of job application process. Rules are applied against the selected project and its associated jobs that are active in nature.

Resources moved to Endorsement using any active auto-endorsement configuration rule will have **Auto-Endorsement-Passed** as an auto recruitment note.

This guide will explain how to create and manage an auto-endorsement configuration rule.

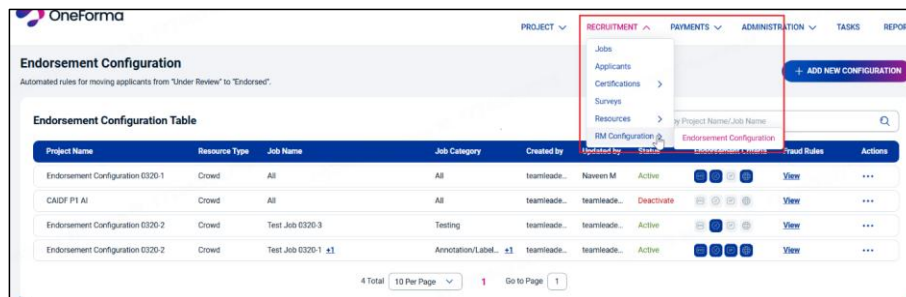

Pre-requisite

Resources must have passed all other stages of job application process, including certification and survey, before they can be moved into **Under Review**.

Access RM Configuration

Only team leads are allowed to create configuration rules.

1. From the **Recruitment** menu, click **RM Configuration**, and then select **Endorsement Configuration**.

2. Click **Add New Configuration**.

Configure Auto-Endorsement Rule

To configure an auto-endorsement rule, you must define the rule's scope and the criteria based on which the application endorses eligible resources.

Rule Scope

- 1. Select a project from the drop-down menu.
The application dynamically populates the **client**, **project category**, **Project Sub-Category**, and **Resource Type** fields.
- 2. Select the relevant job(s) or all jobs.
- 3. Click **View Selected Job** to see the selected jobs.
The application dynamically populates the respective job categories after you select job(s).

Eligibility Criteria

- 1. By default, only resources with an **active KYC status** will be eligible.

2. Enable the **Fraud Score** toggle switch.

Adjust the range slider to set a desired fraud score between 0 to 100.

3. Enable the **Resource IP Match** toggle switch.
4. Select the relevant parameter(s).

Parameter	Description
Job Target Country	Approves resources accessing OneForma through IP addresses listed for the selected job target country.
Country of Residence	Approves resources accessing OneForma through IP addresses of the selected country of residence.
KYC Nationality	Approves resources accessing OneForma through IP addresses of nationality as given in KYC.

5. Enable the **KYC Claimed Country Match** toggle switch.
6. Select the relevant parameter.

Parameter	Description
Target Language (translation jobs)	Approves resources who have configured the job target language as their target in their Translation Languages section.
Locale (non-translation jobs)	Approves resources who have configured the target locale in their Native or Spoken Languages section; this depends on the Language Attribute selection.

7. Enable the toggle switch for the rule to take effect immediately after publishing.

8. Click **Save and Publish**.

Manage Endorsement Configuration Rules

You can view, modify, or deactivate an existing rule based on your needs.

View

You can view the selected endorsement criteria and fraud rules from the Endorsement Configuration table. Recruitment Directors have only view access to existing rules.

1. Locate the relevant endorsement rule.
2. Navigate to the **Endorsement Criteria** column and hover over the applied criteria.
3. Navigate to the **Fraud Rules** column and click **View** to see the platform-specific fraudulent measures configured for the selected jobs.

Endorsement Configuration Table									
Project Name	Resource Type	Job Name	Job Category	Created by	Updated by	Status	Endorsement Criteria	Fraud Rules	
Endorsement Configuration 0320-1	Crowd	All	All	teamleade...	Naveen M	Active			View
CAIDF P1 AI	Crowd	All	All	teamleade...	teamleade...	Deactivate			View
Endorsement Configuration 0320-2	Crowd	Test Job 0320-3	Testing	teamleade...	teamleade...	Active			View
Endorsement Configuration 0320-2	Crowd	Test Job 0320-1 +1	Annotation/Labe...	teamleade...	teamleade...	Active			View

Modify

As recruitment team lead, you can modify the selected endorsement criteria and fraud rules. Recruitment team leads, team owners, recruitment director back-ups, and super admin are allowed to modify existing rules.

1. Locate the relevant endorsement rule.
2. Navigate to the **Actions** column and select **Edit** to modify existing configurations.

Deactivate

As recruitment team lead, you can deactivate a selected endorsement configuration rule.

1. Locate the relevant endorsement rule.
2. Navigate to the **Actions** column and select **Deactivate**.

You can use advanced filters to find relevant rules based on the following:

- Name of the employee who has created the rule.
- Name of the employee who has updated the rule.
- Status of the rule.
 - Active - active endorsement configurations
 - Deactivated - inactive endorsement configurations

Commented [TA2]: Who can create and modify the rules part should be added under the modify section. Keep the filter part here and move only the part after semicolon to the modify section
